Global Reciprocal Colleges

GRC Enrollment System

User manual and guide

Admission Staff edition, for Global Reciprocal Colleges

Edition 1.0, October 2026

Contents

For everyone

Getting started

Sign in, find your way around, and read the words the system uses — 9 topics

- How enrollment works, start to finish
- Signing in
- Setting up your account for the first time
- If you forget your password
- Finding your way around the portal
- Notifications
- Using GRC Connect on your phone
- Words you will see
- When something goes wrong

By role

Admission Staff

Create student accounts and keep official records correct — 5 topics

- Create a student account
- Student directory
- Freshmen
- Change requests
- Enrollment Dashboard

Getting started

GRC Connect is where Global Reciprocal Colleges runs enrollment: schedules, subject selection, approvals, payment and records. Everyone signs in at the same page and sees only the pages that belong to their role.

This chapter applies to every role. After it, open the chapter for your own role to see its pages and how to finish each task.

How enrollment works, start to finish

Enrollment passes through several offices, in a fixed order. Knowing who has the next step tells you why a request is waiting and who to ask about it.

- **Registrar Head**

  Creates the school year and semester that starts the enrollment cycle.

- **Program Head**

  Plans the sections, rooms, capacities and teachers for each subject, then sends the schedule for approval.

- **Dean, then Executive Director**

  The Dean approves the plan or returns it with notes. The Executive Director gives the final approval and publishes it.

- **Student**

  Chooses a section for each subject and submits the enrollment.

- **Program Head, for irregular enrollments**

  Approves or rejects an irregular or overloaded enrollment of their own college before it reaches the Registrar.

- **Registrar Staff or Registrar Head**

  Approves the submitted enrollment so the student can go to payment.

- **Accounting Staff (the Cashier)**

  Calls the student's queue number and confirms the payment. The enrollment is then complete and the Certificate of Registration is ready.

> **Good to know**
> New freshmen and transferees pay first. Admission gives them a queue number, the Cashier confirms their first payment, and only then do they receive the email to set up their account.

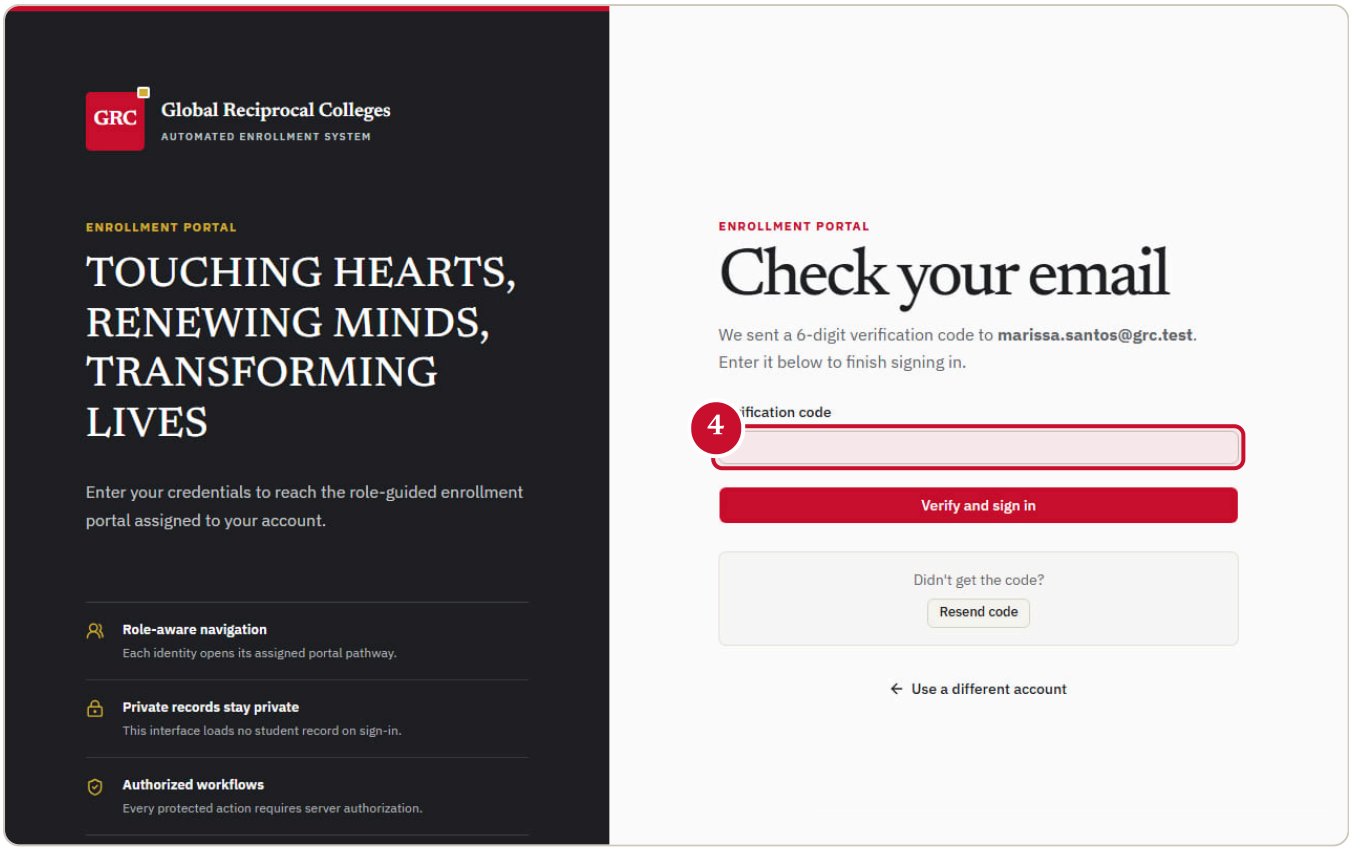

Signing in

Open the sign-in page from the **Sign in to portal** button on the home page. Use the email address your office registered for you.

1. Type your **Email address**.
2. Type your **Password**.
3. Select **Sign in**.
   You can also use Sign in with Google, if a GRC account exists for that Google email.
4. If asked, enter the 6-digit code sent to your email and select **Verify and sign in**.
   The sign-in page then says Check your email. The code works for a short time and only a few wrong attempts are allowed. Select **Resend code** if it does not arrive.

The sign-in page.

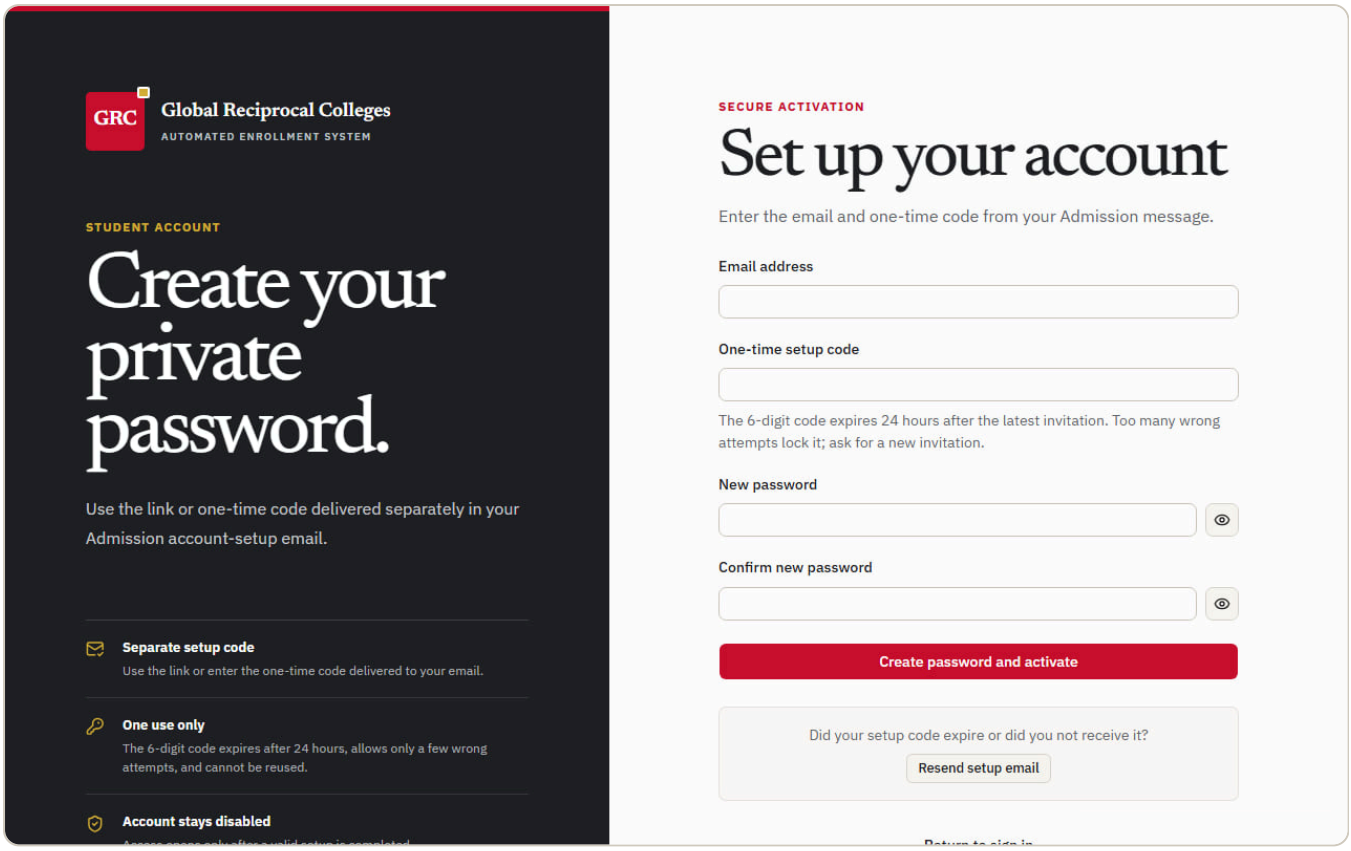

Step 4: the code step, shown when the system needs to confirm it is you.

> **Tip**
> You may not be asked for a code if you signed in a little while ago. Sign out when you use a shared computer.

Setting up your account for the first time

You do not choose your own password at first. Your office sends you an email with a 6-digit setup code. Students receive it from Admission. Professors are invited by their Program Head, and staff by the Registrar Head.

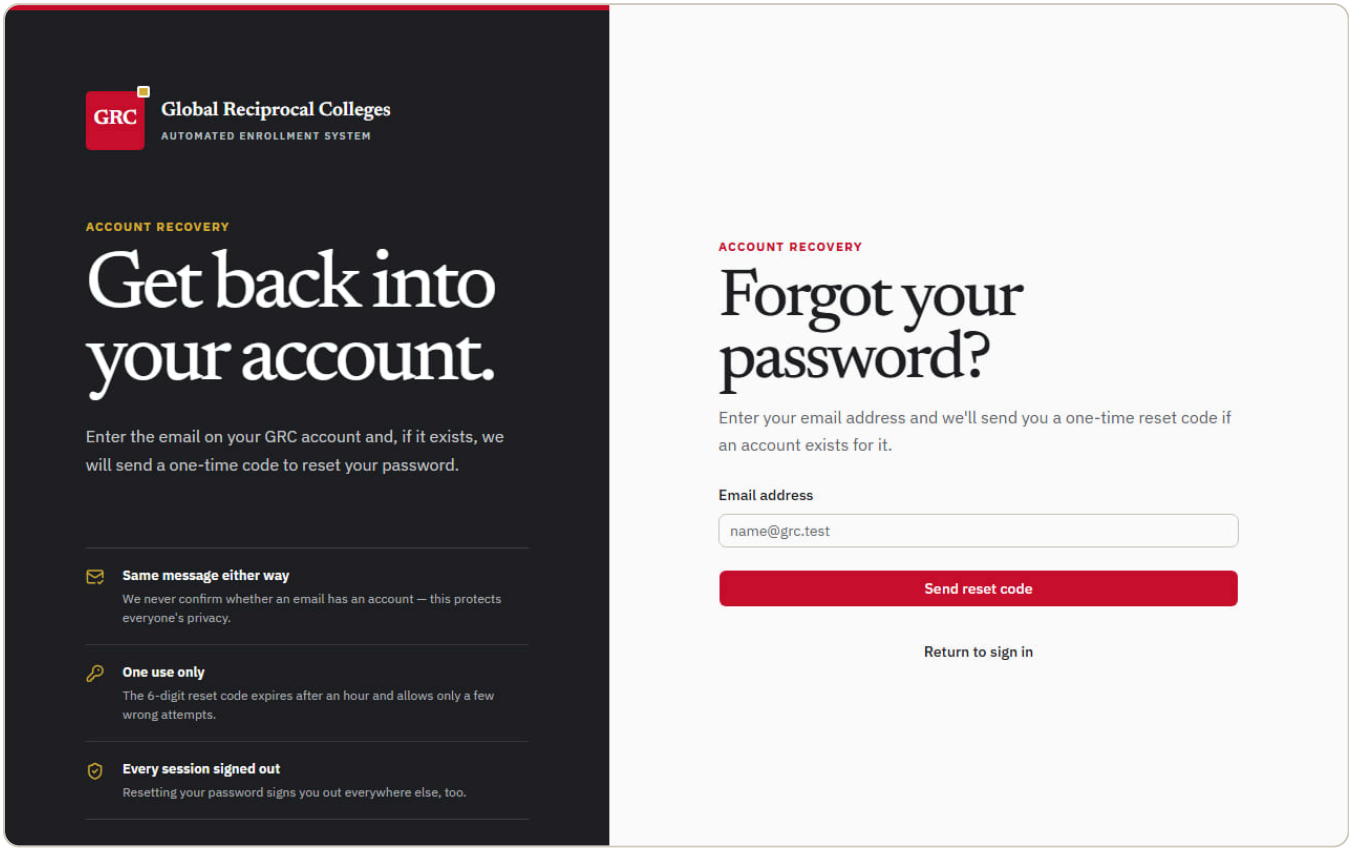

The account setup page.

1. Open the link in the email, or go to the account setup page.
2. Enter your email and the 6-digit **setup code**.
3. Create your password, then type it again to confirm it.
   Use at least 8 characters with a lowercase letter, an uppercase letter, a number and a symbol.
4. Select **Create password and activate**, then sign in with your new password.

> **Be careful**
> The setup code can be used once and expires after 24 hours. A student whose code expired can select **Resend setup email** on the same page. Professors and staff ask the office that invited them to send a new one.

If you forget your password

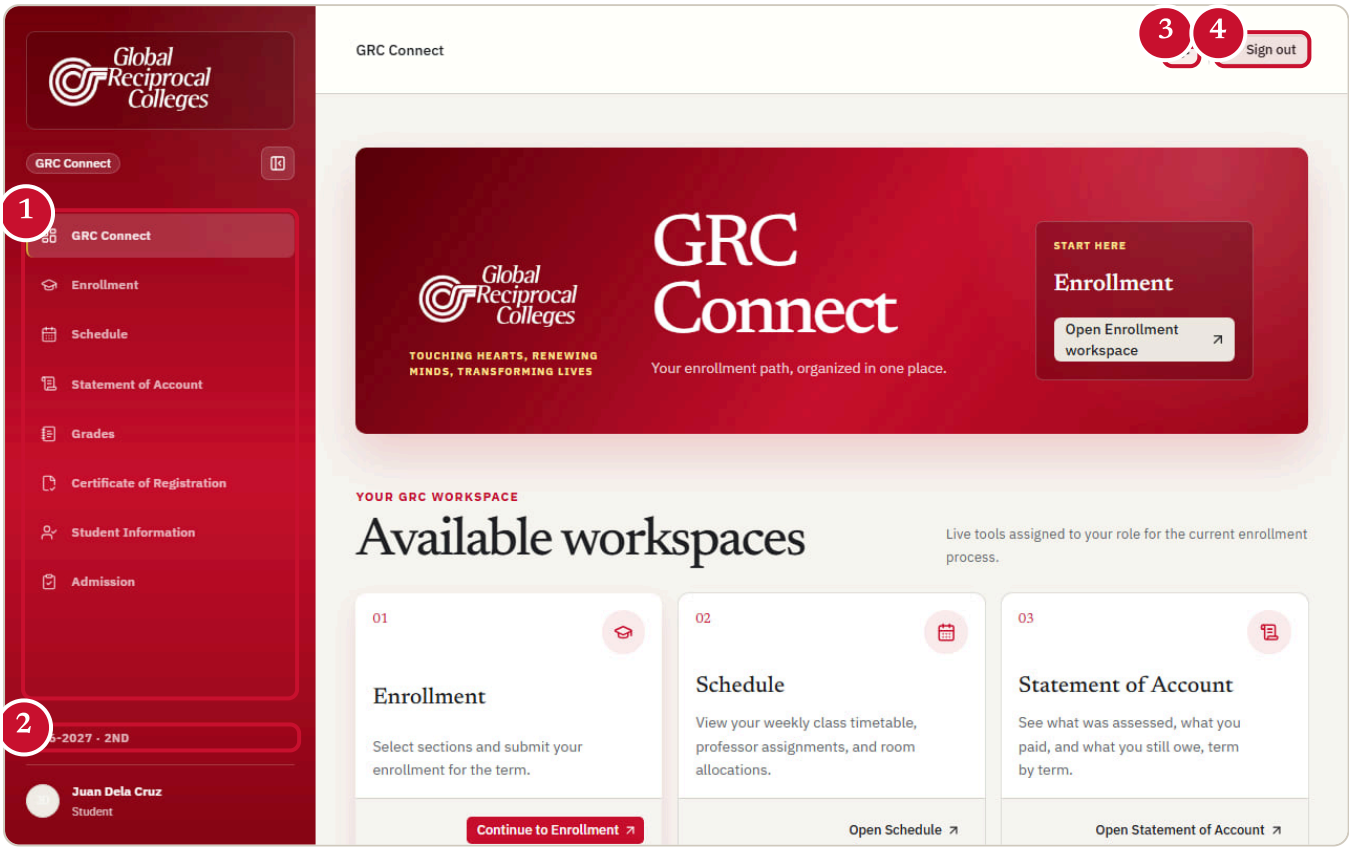

Request a reset code from the sign-in page with Forgot password?

1. On the sign-in page, select **Forgot password?**.
2. Enter your email address and select **Send reset code**.
3. Open the email, then enter the 6-digit code and your new password.
   The reset code works once and expires after an hour.
4. Sign in with the new password.

> **Good to know**
>
> Resetting your password signs you out everywhere. There is no change-password page inside the portal, so use this same route any time you want a new password.

Finding your way around the portal

After you sign in you land on **GRC Connect**, your home page. The menu on the left lists only the pages your role can use. The top bar holds your notifications and **Sign out**.

The portal home page for a student. Other roles see their own pages in the same layout.

1. **Menu**: the pages for your role. Select one to open it.
2. **Current term**: the school year and semester everything on screen refers to.
3. **Notifications**: the bell at the top. A red number means you have unread messages.
4. **Sign out**: always sign out on a shared computer.

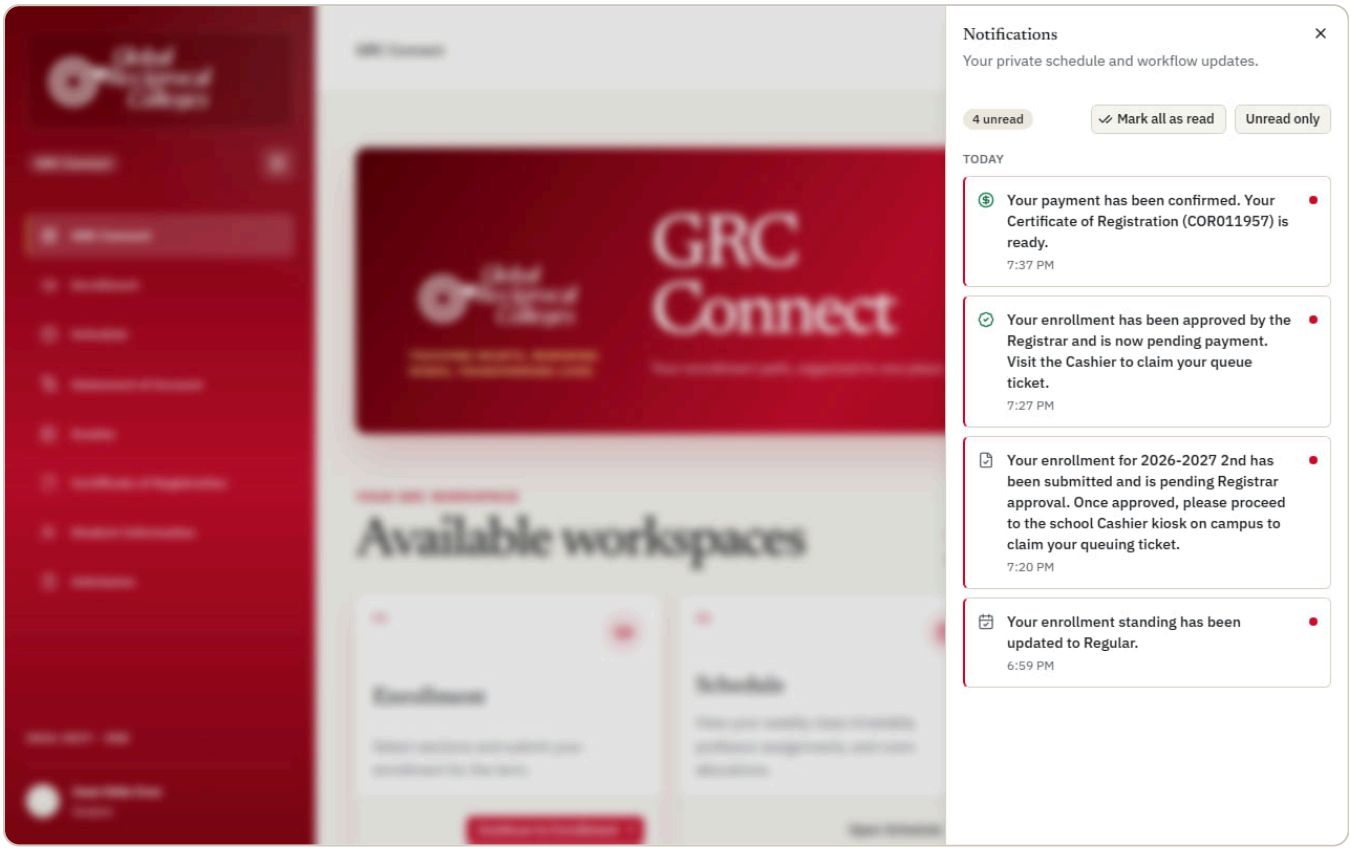

The small square next to the **GRC Connect** label collapses the menu to give the page more room.

User guide in the top bar opens this guide at the chapter for your role. On a phone it is at the bottom of the menu.

> **Good to know**
>
> If you see No active academic term, the Registrar Head has not opened a school year and semester yet. Most enrollment pages stay empty until then.

Notifications

The system tells you when something needs you or has changed: a schedule is published, an enrollment is approved, a request is returned. Select the bell to read them.

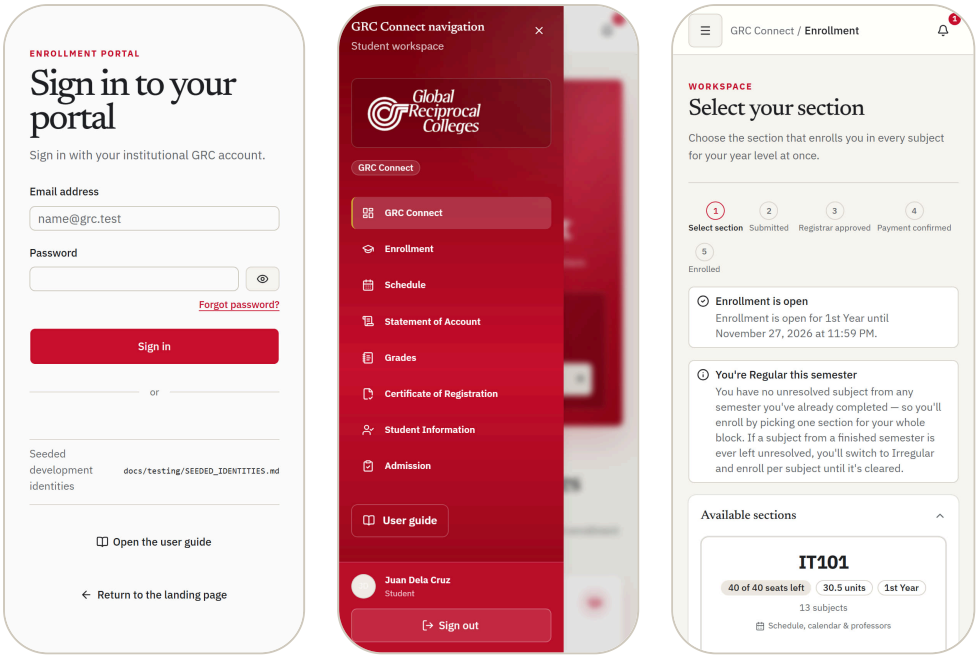

The notifications panel.

- Select a message to open it and mark it as read.
- Select **Mark all as read** to clear the red number.
- Select **Unread only** to hide messages you have already read.

Using GRC Connect on your phone

Every page works on a phone. The menu moves behind the button at the top left, and tables turn into stacked cards so you never have to scroll sideways.

Sign in, open the menu, and use a page on a phone.

Words you will see

Academic term	One school year and semester, for example 2026-2027 1st semester.
Section	One class of a subject, with its own days, time, room and teacher.
Block	The set of sections a regular student takes together in one semester.
Regular student	A student who follows the full block for their year level and semester.
Irregular student	A student who chooses subjects one by one, for example after a back subject or a credited subject. Their enrollment also goes to the Program Head for approval.
Prospectus	Every subject in a student's curriculum, with the grade earned so far.
Units	The credit value of a subject. Tuition is based on the units enrolled.
Assessment	The amount a student must pay for the term, built from tuition and fees.
Queue number	The ticket that tells the Cashier when it is your turn to pay.
Certificate of Registration (COR)	The document that proves you are enrolled. It is available once the Cashier confirms payment.

When something goes wrong

The email or password you entered was not recognized	Check the email and password, then try again. If you are not sure of the password, use **Forgot password?**.
Too many attempts	Wait a few minutes before you try again.
The code did not arrive	Check your spam folder, then select **Resend code**.
This verification code is invalid or expired	Select **Resend code** and use the newest email.
No GRC account was found for this Google email	Contact Admission or the Registrar's Office to have your account created.
Your session cannot be restored after refresh on this browser	Your browser is blocking site storage. Allow it for this site, or sign in again after each refresh.
A page is empty	Check the current term at the bottom of the menu. Most pages wait for the Registrar Head to open the school year and semester.

> **Tip**
> If none of this helps, contact the office that handles your request: Admission for accounts, the Program Head for schedules, the Registrar for approvals and records, Accounting for payments.

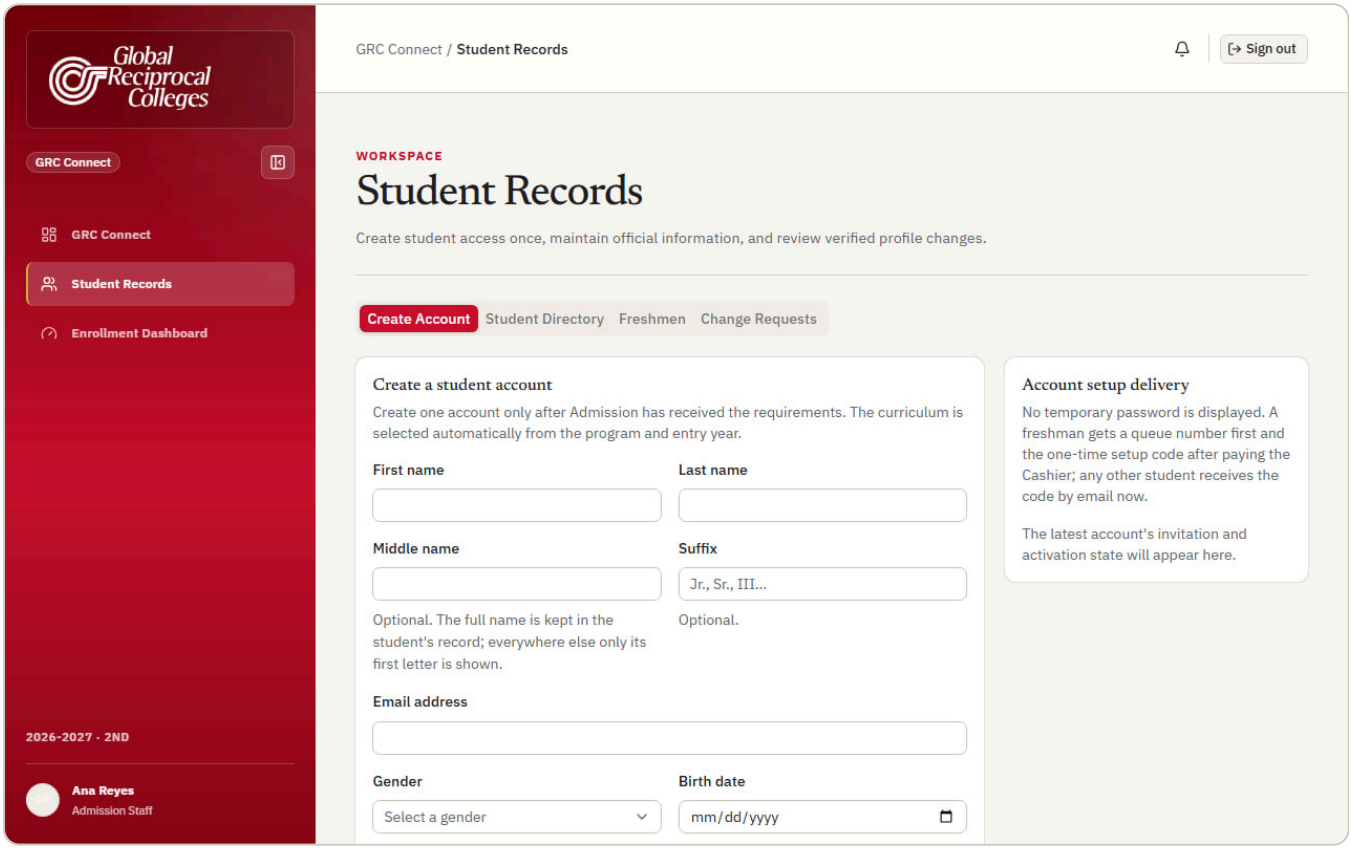

Admission Staff

Admission creates every student's account and keeps the verified profile and the list of submitted requirements. You cannot edit grades, curriculum, payments or Registrar approvals.

Your menu has two pages: Student Records and Enrollment Dashboard.

Create a student account

Create an account only after Admission has received the student's requirements. No password is ever shown or typed for the student: the system emails a one-time setup code instead.

Student Records opens on the Create Account tab.

1. Open **Student Records** and stay on the **Create Account** tab.

2. Fill in **First name**, **Last name** and **Email address**.
   Middle name and **Suffix** are optional. The full middle name stays in the student's record, and everywhere else only its first letter is shown.

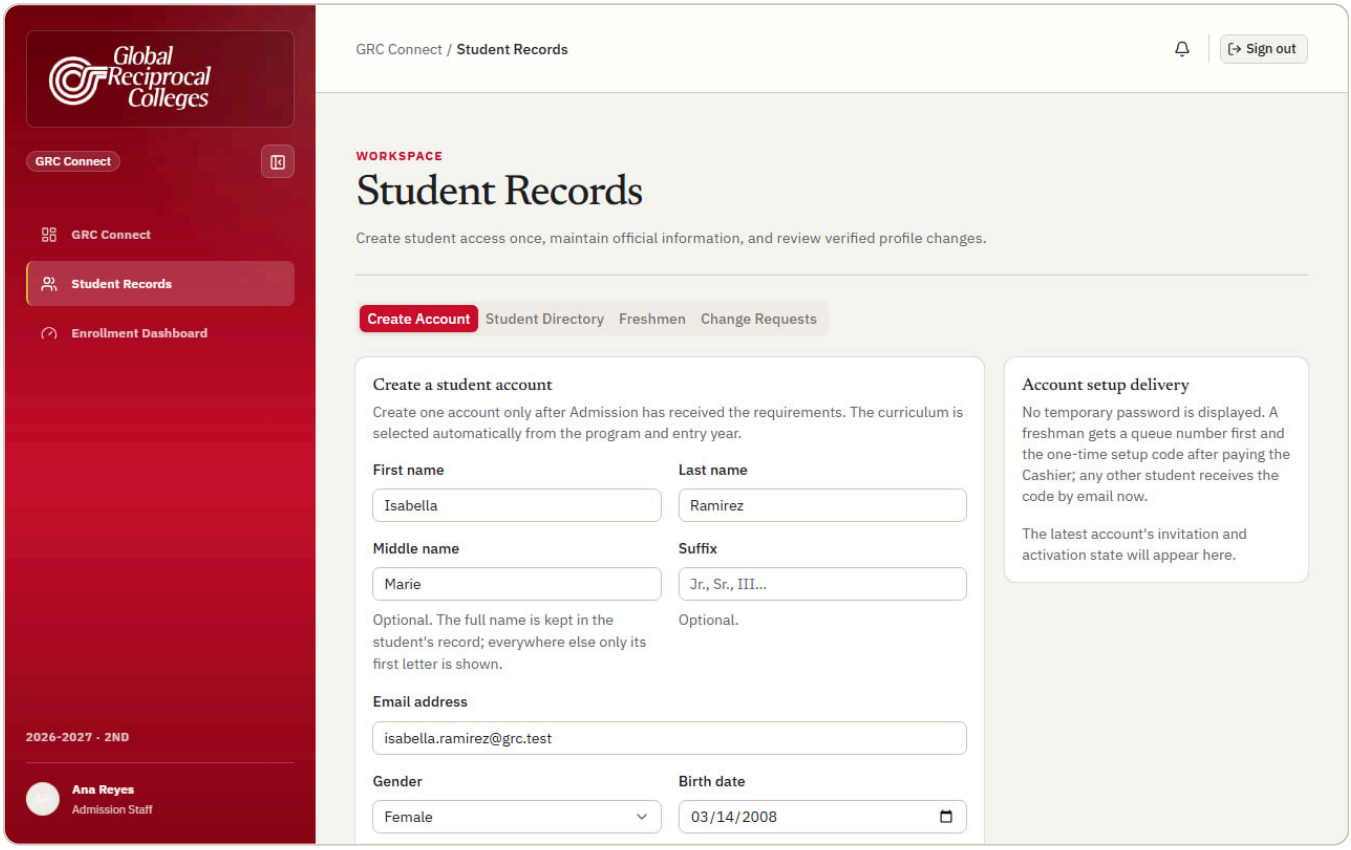

3. Fill in **Gender**, **Birth date**, **Citizenship**, **Contact number** and the address: **Street / barangay**, **Town / city** and **Province**.

4. Choose the **Student type**: Freshman, Transferee, Returnee or Existing Student.

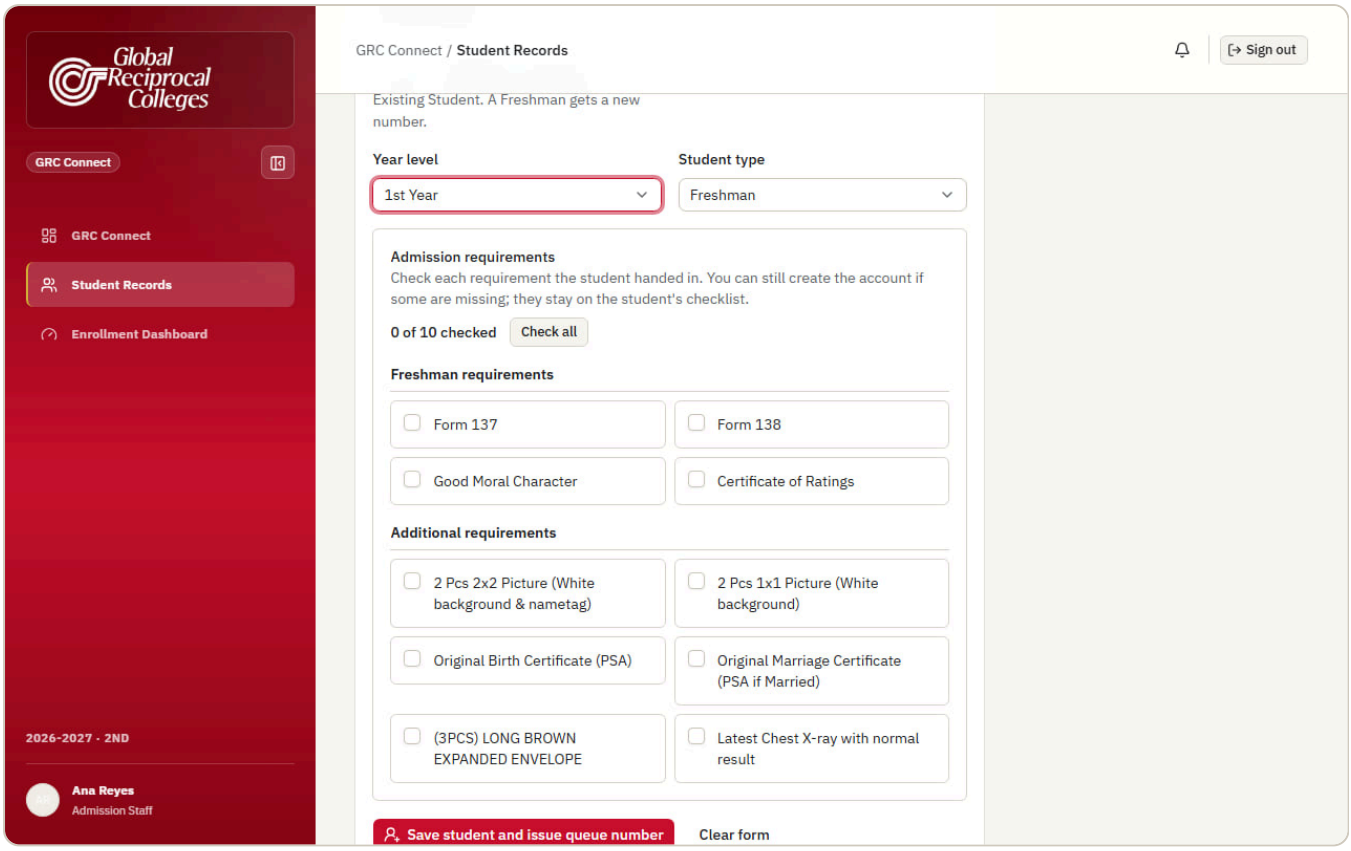

5. Check the **Student number**.
   It is the next number in order and is confirmed when you save. Tick **Student already has a student number** only for a transferee, a returnee or an existing student, then type it as YYYY-MM-NNNNN. A freshman always gets a new number.

6. Choose the **Program** and the **Year level**. The curriculum is picked automatically from the program and entry year.

7. Select **Create account and email setup**.

The form filled in for a freshman: names, email, gender, birth date, citizenship, contact number and address.

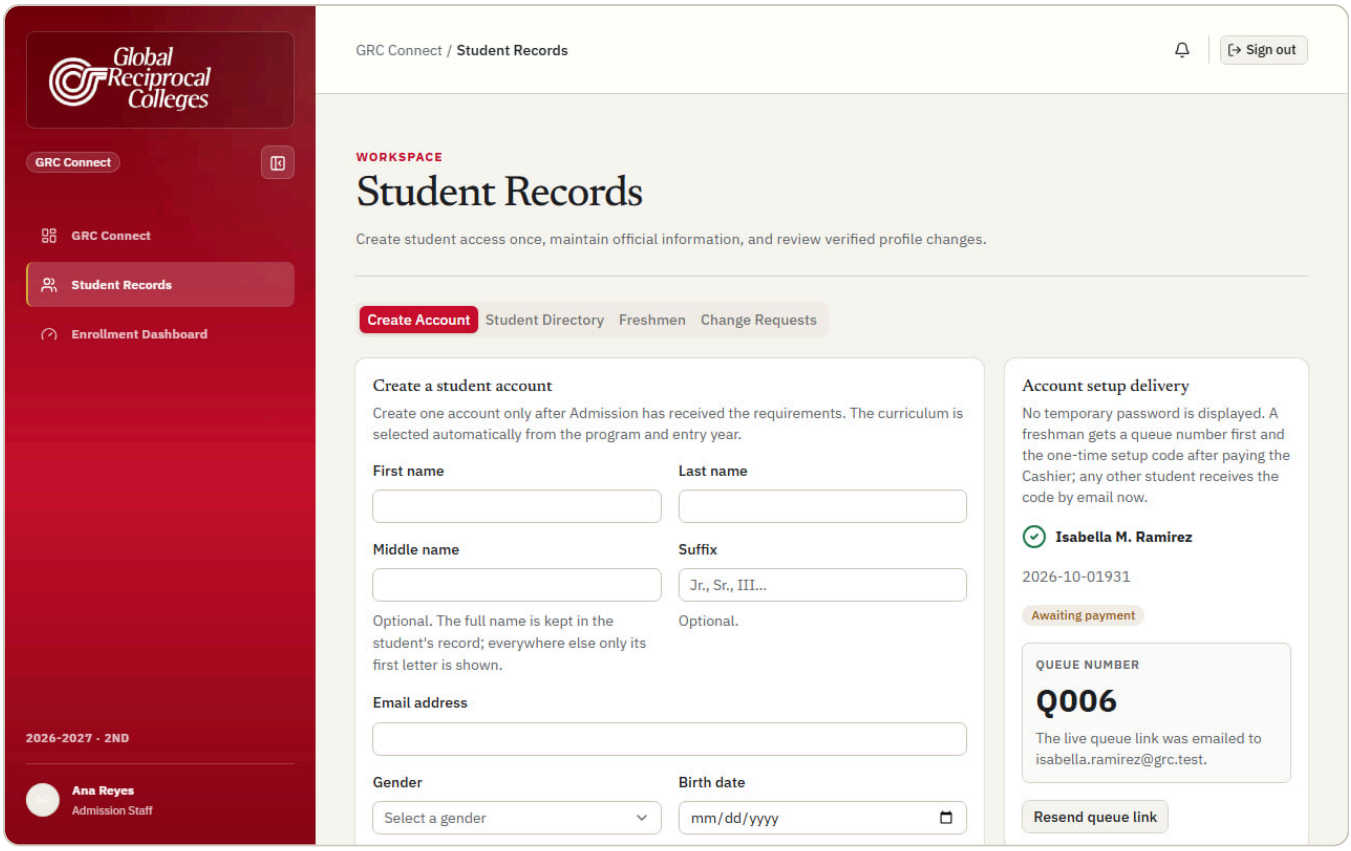

The lower part of the form: student type, student number, program and year level.

> **Freshmen pay first**
>
> For a freshman the button reads **Save student and issue queue number**. The system emails a queue number with a link to the live queue. The account setup email follows only after the Cashier confirms the freshman's first payment.

> **Tip**
>
> Your unsaved details are kept in this browser until you create the account or sign out. Select **Clear form** to start over.

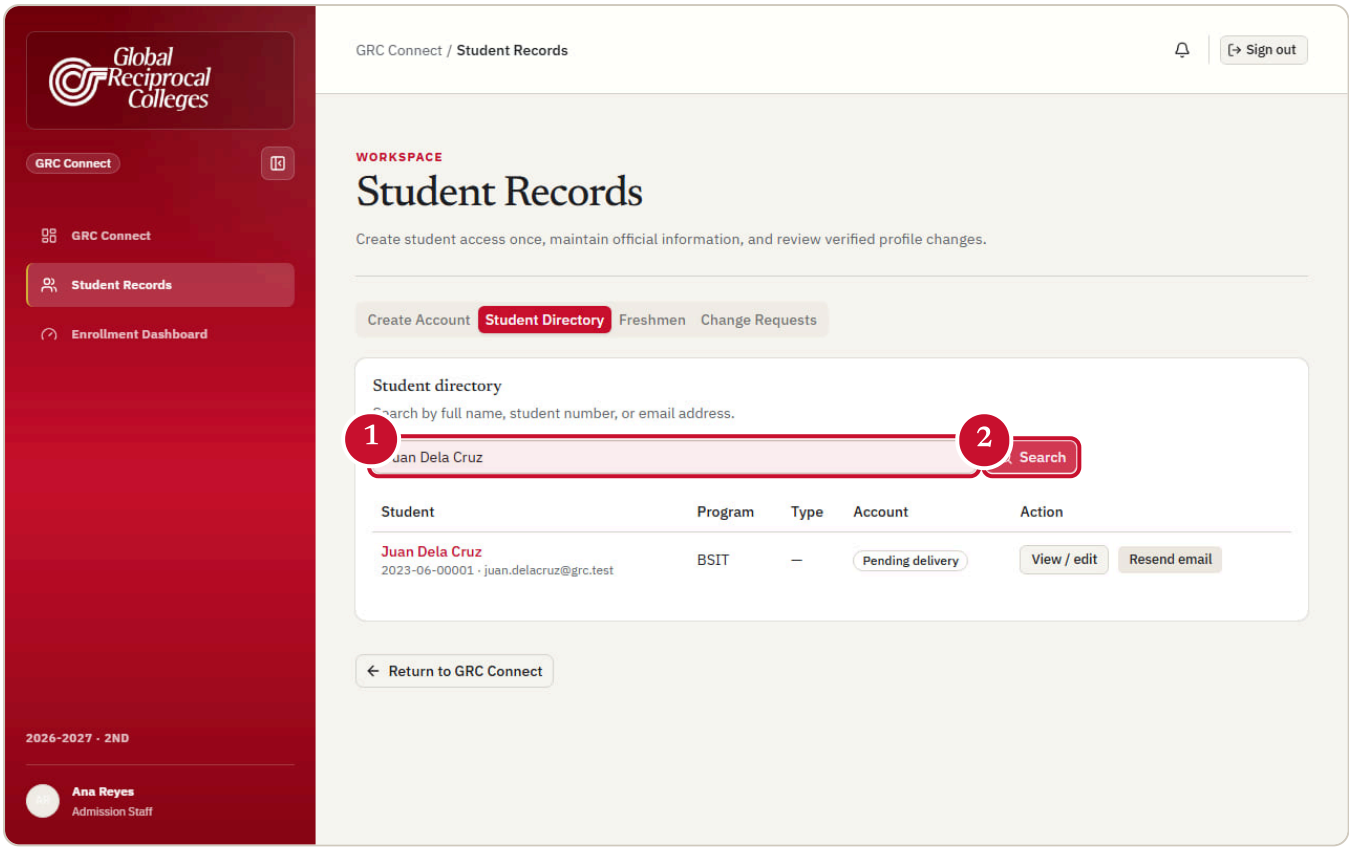

The panel on the right, **Account setup delivery**, shows whether the latest invitation was sent and whether the account is active. The **Admission requirements** card lets you tick each document as you receive it.

After saving a freshman, the form clears and the panel on the right shows the queue number and that the live queue link was emailed. **Resend queue link** sends it again.

Student directory

Open the **Student Directory** tab.

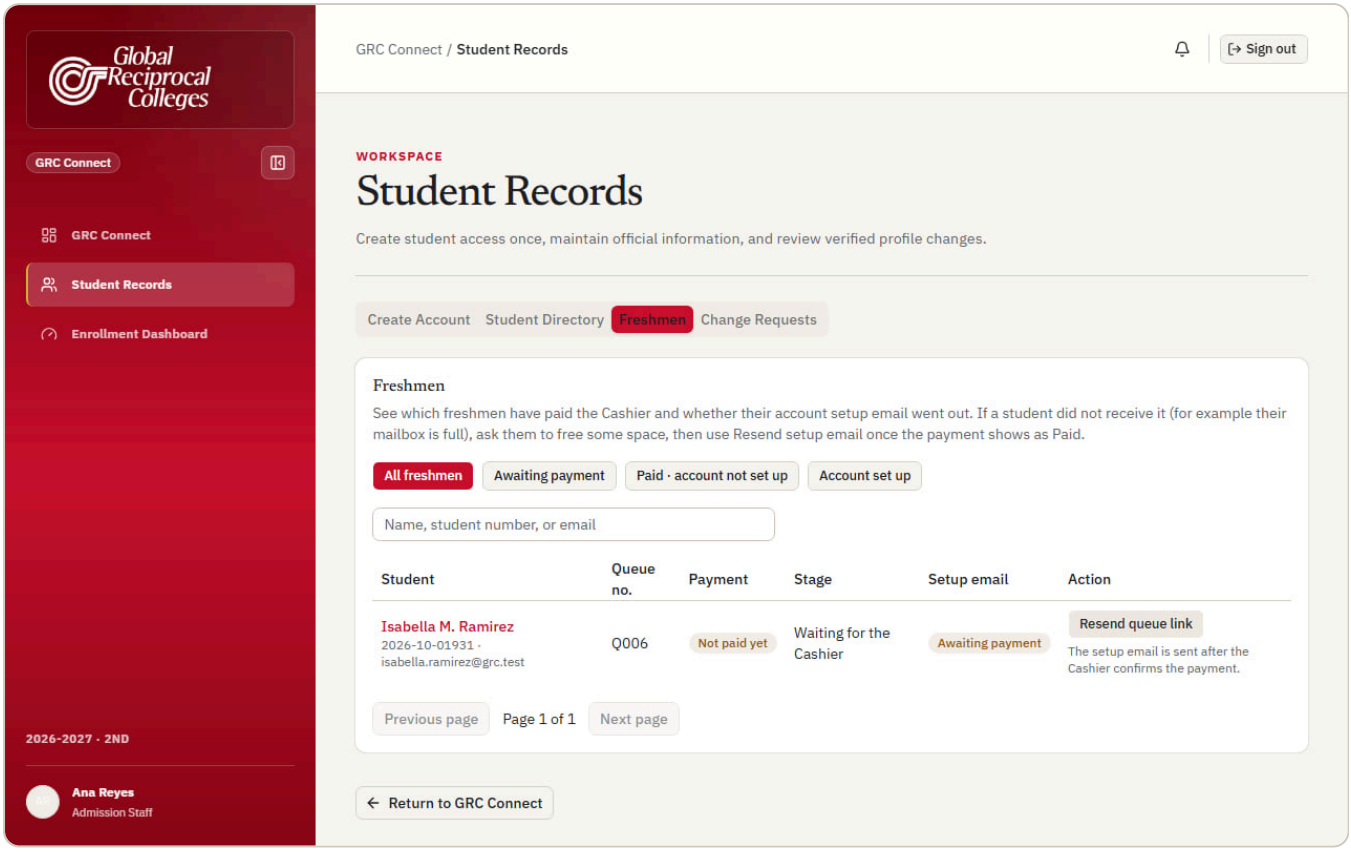

Find a student by name, number or email.

1. Type a name, student number or email in the search box.
2. Select **Search**.
3. Open the student to read the record and the requirements checklist.
4. To correct an official detail, change it, give the reason and select **Save verified correction**.
   Tick **Identity verified in person at Admission** when you have checked the student's documents.

> **Good to know**
> You can also set the admission status to Pending, Admitted, Enrolled, Graduated or Withdrawn.

Freshmen

The Freshmen tab shows who has paid and whose account is ready.

Not paid yet: the freshman has a queue number but the Cashier has not confirmed the first payment.

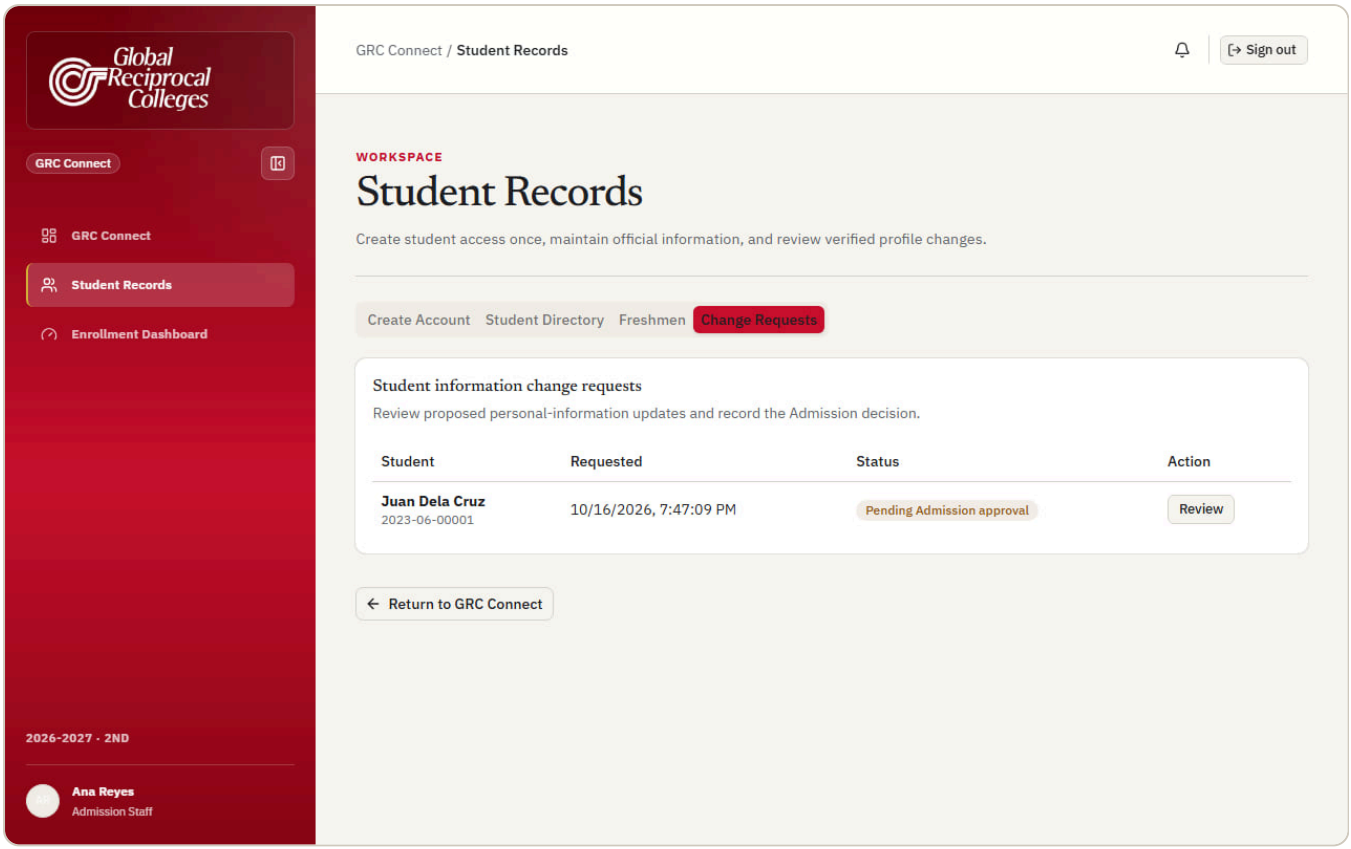

Paid: the payment is confirmed and the setup email has been sent. The account is ready once the student sets a password.

Resend queue link sends the queue number and live-queue link again.

Resend setup email sends a new setup code to a freshman whose code expired or never arrived.

Change requests

A student can ask for a correction to their name, email or address. The change takes effect only after Admission verifies it.

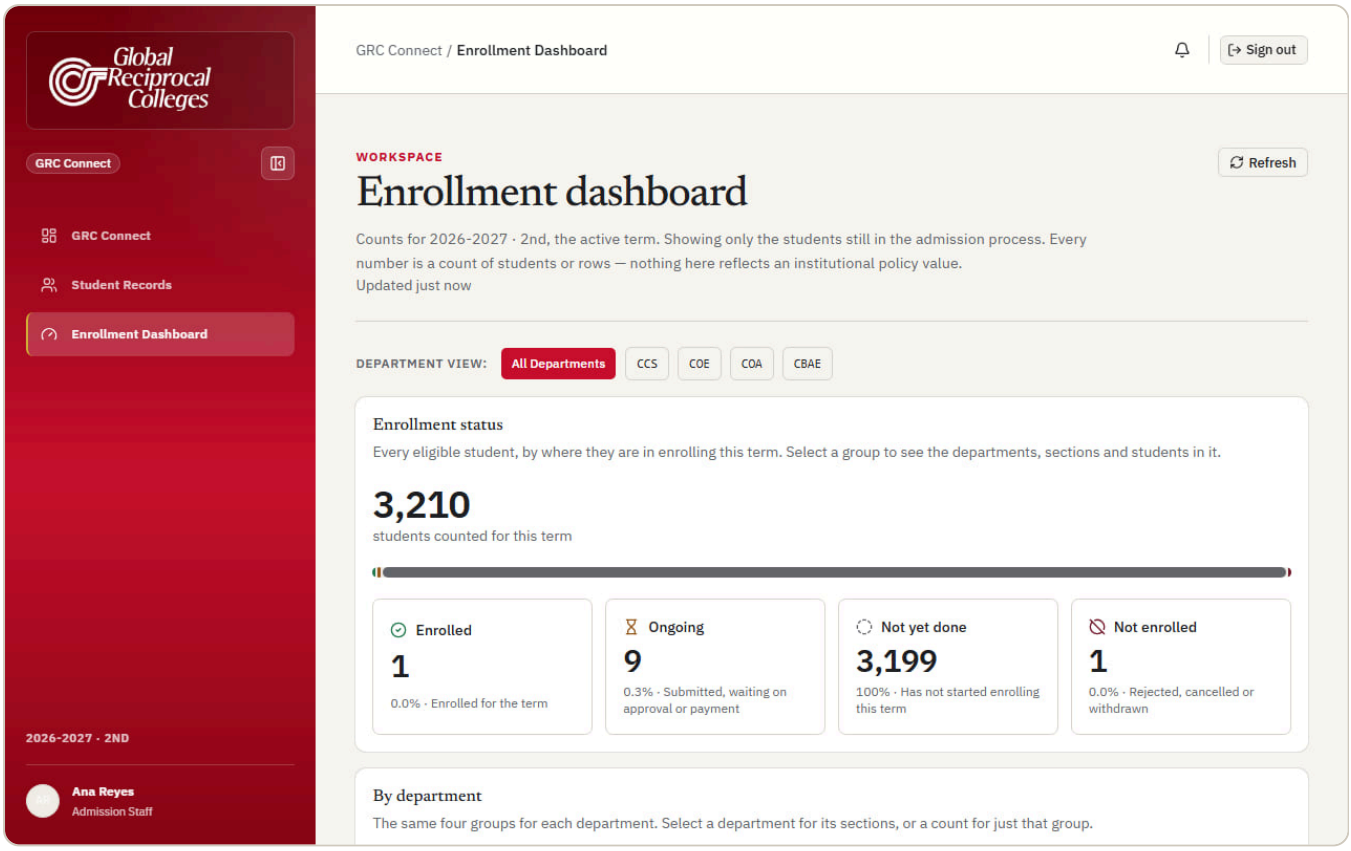

Student information change requests.

1. Open the **Change Requests** tab and select a request.
2. Compare the requested details with the student's record and read the student's reason.
3. Check the student's documents.
4. Select **Approve changes**, or write **Decision notes** and select **Reject with notes**.

> **Be careful**
> Decision notes are required when you reject a request, so the student knows what to bring or correct.

Enrollment Dashboard

A live count of the students who are still in the admission process for the current term.

The Enrollment Dashboard for Admission.

1. Read the number of students counted and the four groups: Enrolled, Ongoing, Not yet done and Not enrolled.
2. Select a group, a department or a section to see the students in it.
3. Select **Refresh** to load the latest numbers.
