Global Reciprocal Colleges

# GRC Enrollment System

*User manual and guide*

Program Head edition, for Global Reciprocal Colleges

Edition 1.0, October 2026

# Contents

## For everyone

### Getting started

Sign in, find your way around, and read the words the system uses — 9 topics

- How enrollment works, start to finish
- Signing in
- Setting up your account for the first time
- If you forget your password
- Finding your way around the portal
- Notifications
- Using GRC Connect on your phone
- Words you will see
- When something goes wrong

## By role

### Program Head

Plan the term's sections, approve irregular enrollments and map credits — 12 topics

- Your semester at a glance
- Enrollment: plan the term's sections
- Irregular Advising: approve irregular enrollments
- Enrollment Dashboard
- Enrollment Analytics
- Curriculum Editor
- Schedule
- Faculty Loading
- Faculty Workforce
- Rooms
- Credit Mappings
- Invite Professors

# Getting started

GRC Connect is where Global Reciprocal Colleges runs enrollment: schedules, subject selection, approvals, payment and records. Everyone signs in at the same page and sees only the pages that belong to their role.

This chapter applies to every role. After it, open the chapter for your own role to see its pages and how to finish each task.

## How enrollment works, start to finish

Enrollment passes through several offices, in a fixed order. Knowing who has the next step tells you why a request is waiting and who to ask about it.

- **Registrar Head**

  Creates the school year and semester that starts the enrollment cycle.

- **Program Head**

  Plans the sections, rooms, capacities and teachers for each subject, then sends the schedule for approval.

- **Dean, then Executive Director**

  The Dean approves the plan or returns it with notes. The Executive Director gives the final approval and publishes it.

- **Student**

  Chooses a section for each subject and submits the enrollment.

- **Program Head, for irregular enrollments**

  Approves or rejects an irregular or overloaded enrollment of their own college before it reaches the Registrar.

- **Registrar Staff or Registrar Head**

  Approves the submitted enrollment so the student can go to payment.

- **Accounting Staff (the Cashier)**

  Calls the student's queue number and confirms the payment. The enrollment is then complete and the Certificate of Registration is ready.

> **Good to know**
> New freshmen and transferees pay first. Admission gives them a queue number, the Cashier confirms their first payment, and only then do they receive the email to set up their account.

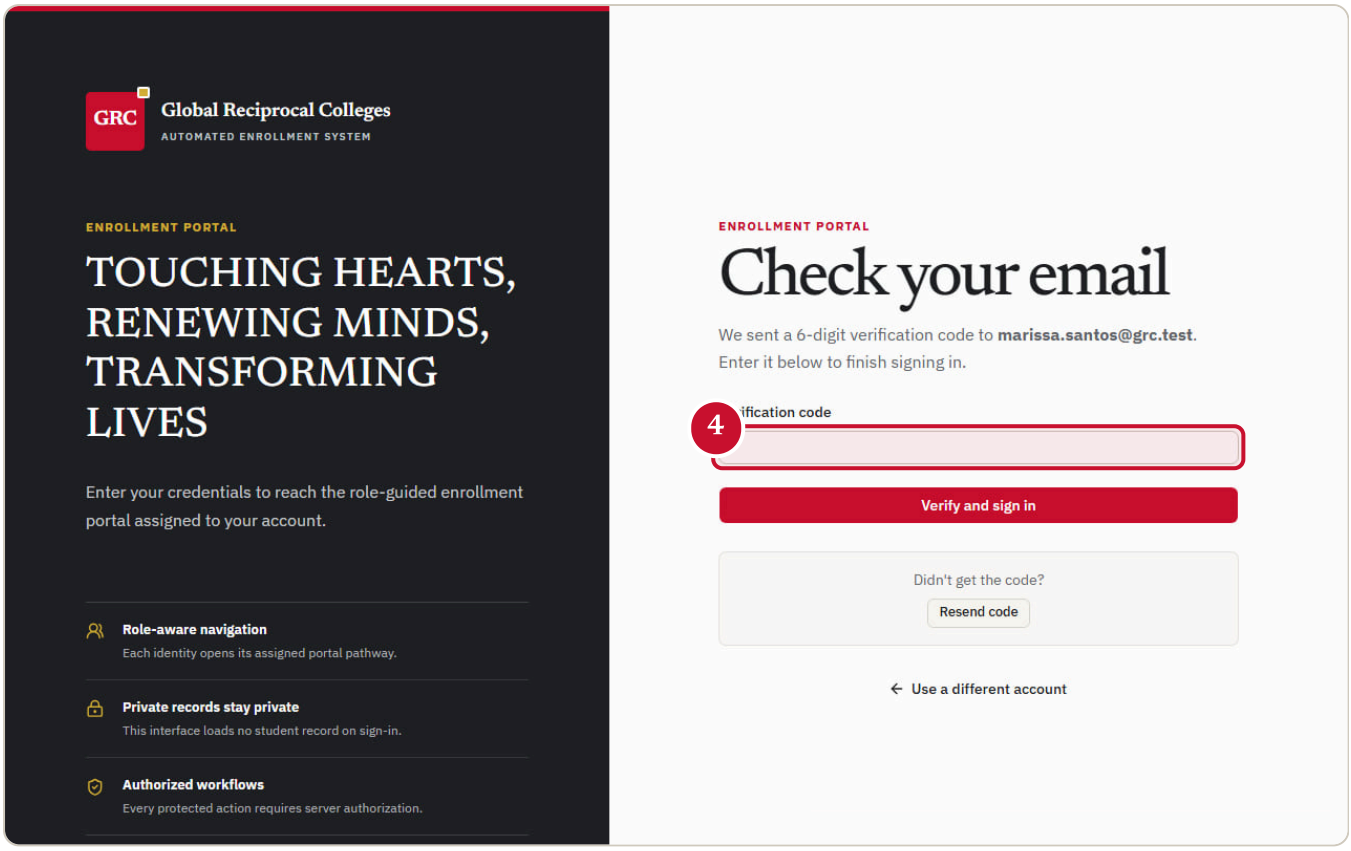

## Signing in

Open the sign-in page from the **Sign in to portal** button on the home page. Use the email address your office registered for you.

1. Type your **Email address**.
2. Type your **Password**.
3. Select **Sign in**.
   You can also use Sign in with Google, if a GRC account exists for that Google email.
4. If asked, enter the 6-digit code sent to your email and select **Verify and sign in**.
   The sign-in page then says Check your email. The code works for a short time and only a few wrong attempts are allowed. Select **Resend code** if it does not arrive.

The sign-in page.

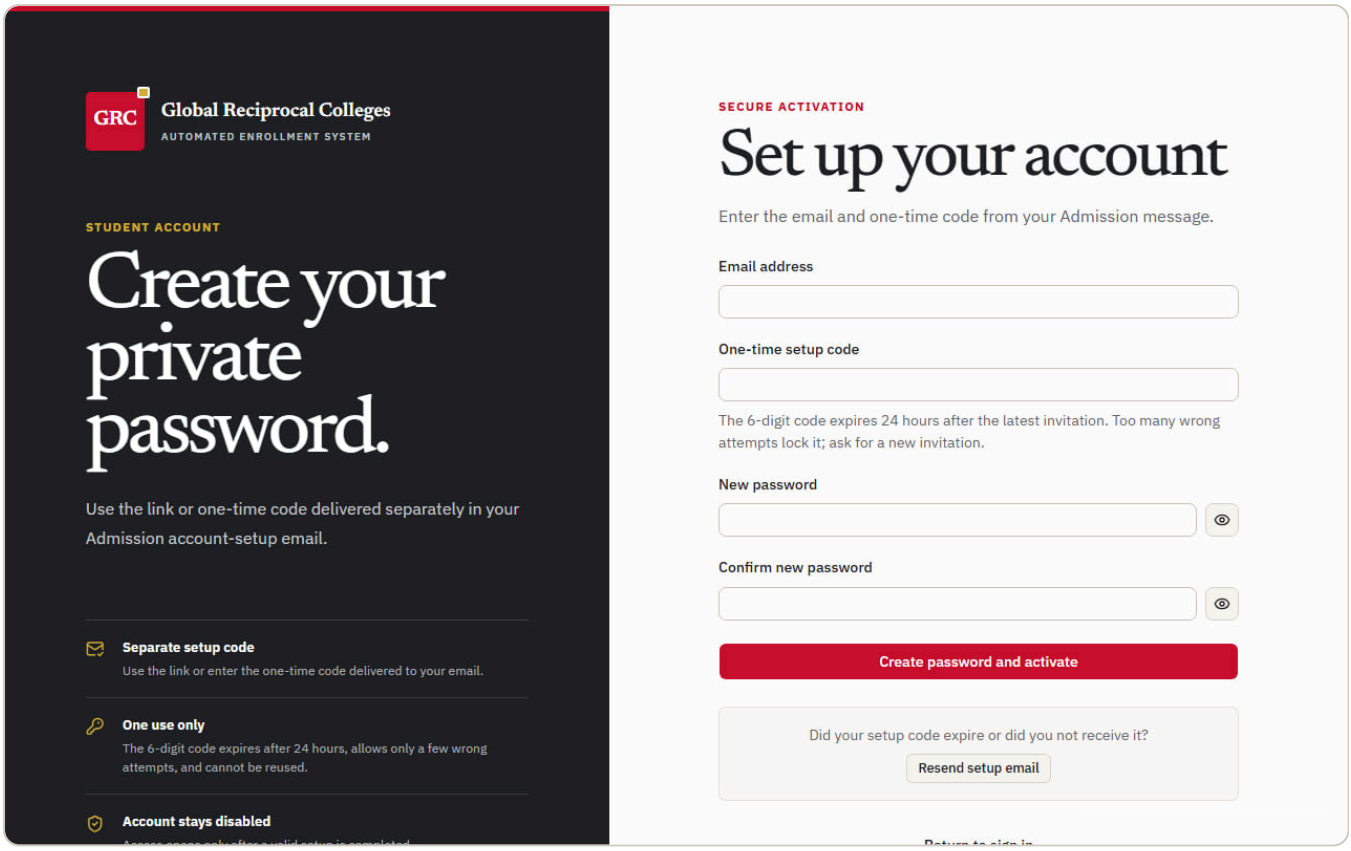

Step 4: the code step, shown when the system needs to confirm it is you.

> **Tip**
> You may not be asked for a code if you signed in a little while ago. Sign out when you use a shared computer.

## Setting up your account for the first time

You do not choose your own password at first. Your office sends you an email with a 6-digit setup code. Students receive it from Admission. Professors are invited by their Program Head, and staff by the Registrar Head.

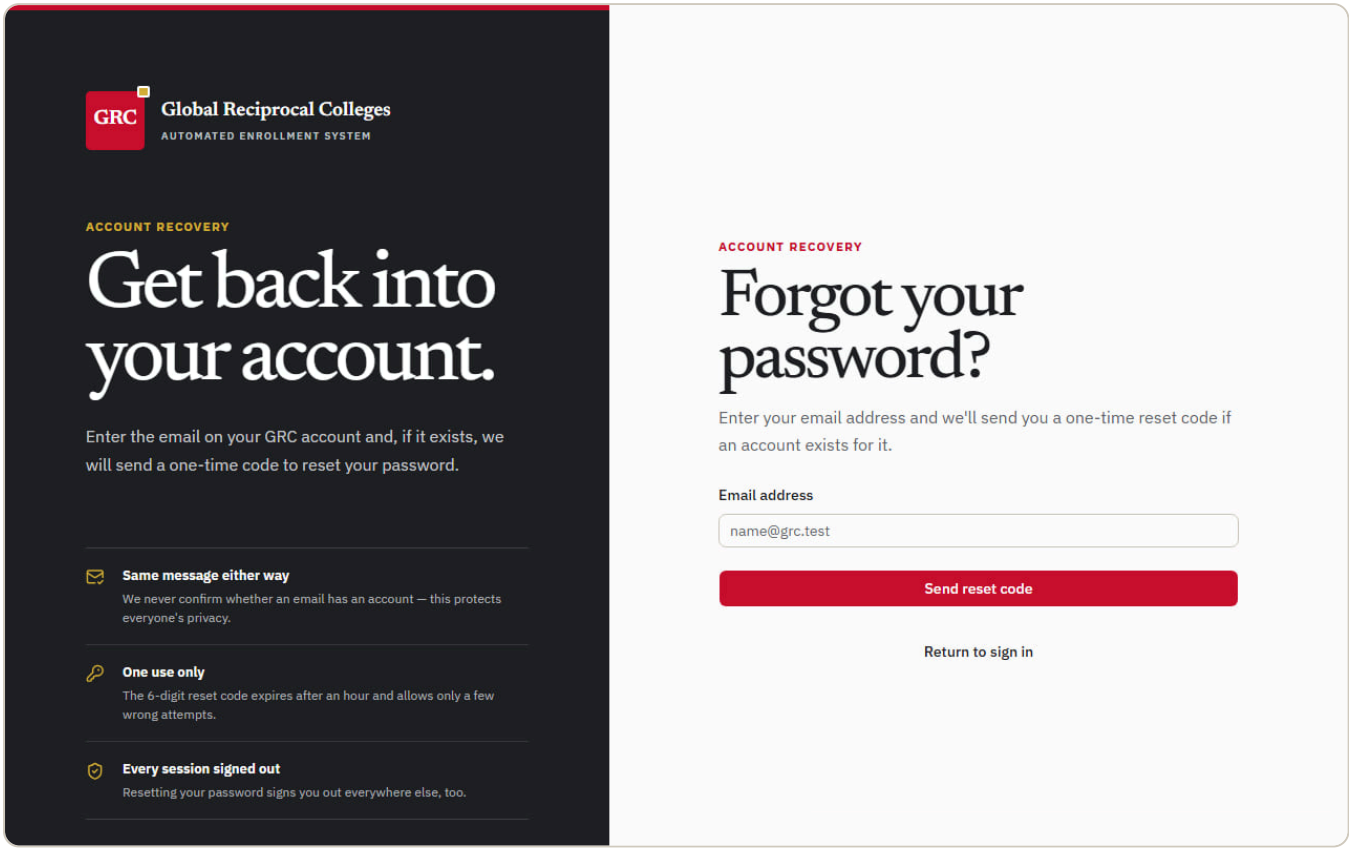

The account setup page.

1. Open the link in the email, or go to the account setup page.
2. Enter your email and the 6-digit **setup code**.
3. Create your password, then type it again to confirm it.
   Use at least 8 characters with a lowercase letter, an uppercase letter, a number and a symbol.
4. Select **Create password and activate**, then sign in with your new password.

> **Be careful**
> The setup code can be used once and expires after 24 hours. A student whose code expired can select **Resend setup email** on the same page. Professors and staff ask the office that invited them to send a new one.

# If you forget your password

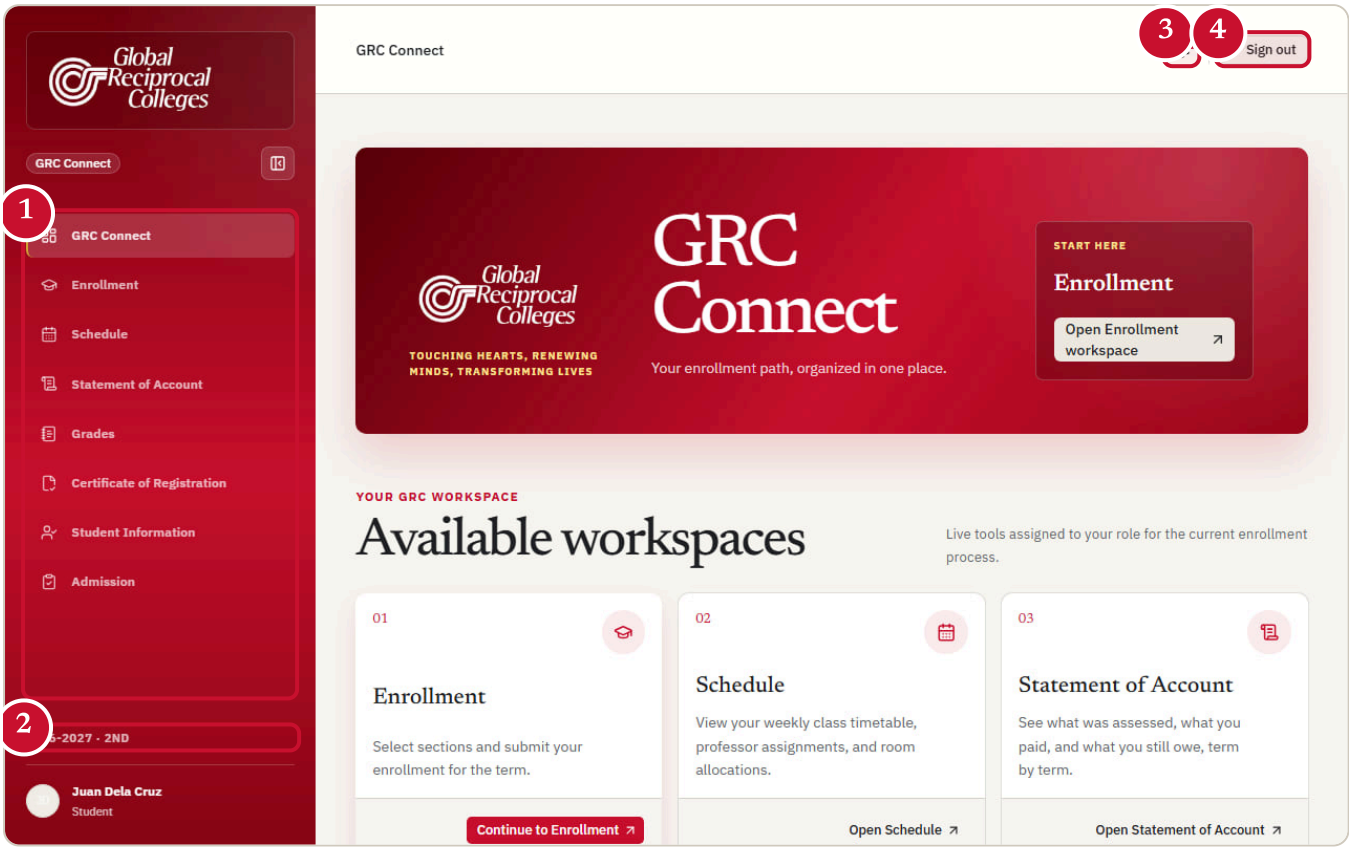

Request a reset code from the sign-in page with Forgot password?

1. On the sign-in page, select **Forgot password?**.
2. Enter your email address and select **Send reset code**.
3. Open the email, then enter the 6-digit code and your new password.
   The reset code works once and expires after an hour.
4. Sign in with the new password.

> **Good to know**
>
> Resetting your password signs you out everywhere. There is no change-password page inside the portal, so use this same route any time you want a new password.

# Finding your way around the portal

After you sign in you land on **GRC Connect**, your home page. The menu on the left lists only the pages your role can use. The top bar holds your notifications and **Sign out**.

The portal home page for a student. Other roles see their own pages in the same layout.

1. **Menu**: the pages for your role. Select one to open it.
2. **Current term**: the school year and semester everything on screen refers to.
3. **Notifications**: the bell at the top. A red number means you have unread messages.
4. **Sign out**: always sign out on a shared computer.

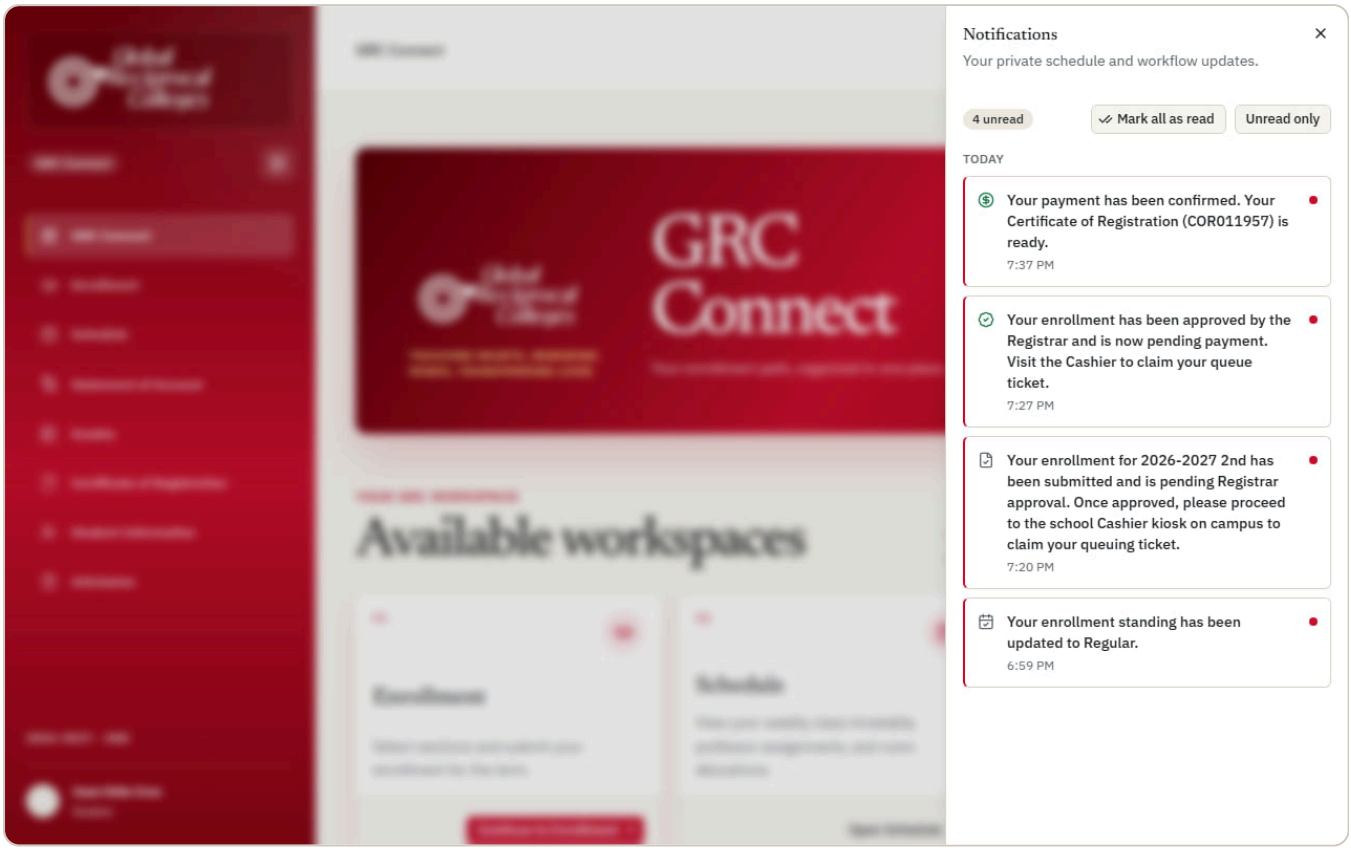

The small square next to the **GRC Connect** label collapses the menu to give the page more room.

**User guide** in the top bar opens this guide at the chapter for your role. On a phone it is at the bottom of the menu.

> **Good to know**
>
> If you see No active academic term, the Registrar Head has not opened a school year and semester yet. Most enrollment pages stay empty until then.

## Notifications

The system tells you when something needs you or has changed: a schedule is published, an enrollment is approved, a request is returned. Select the bell to read them.

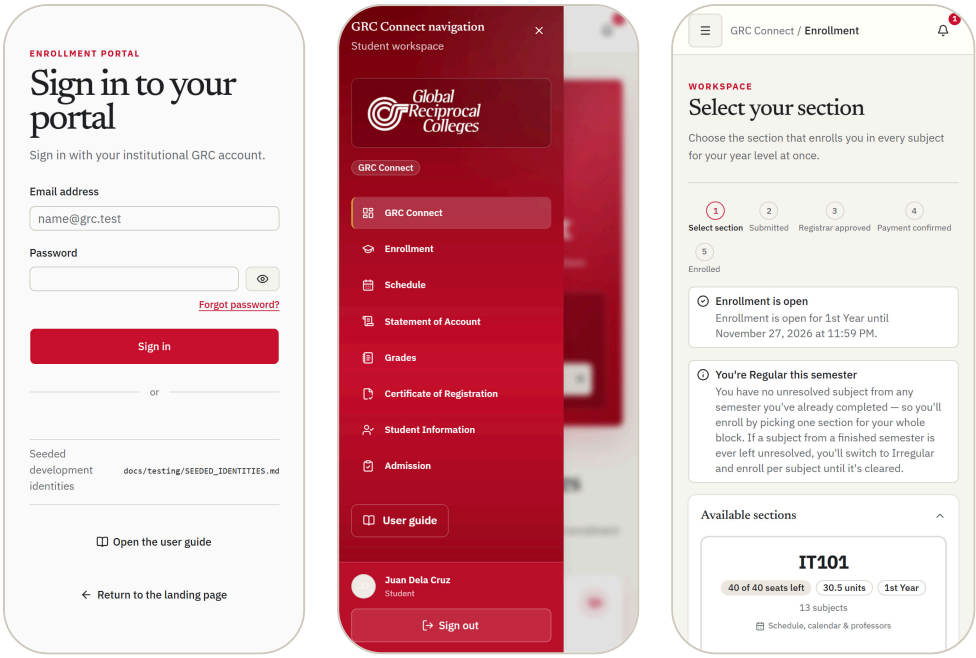

The notifications panel.

- Select a message to open it and mark it as read.
- Select **Mark all as read** to clear the red number.
- Select **Unread only** to hide messages you have already read.

## Using GRC Connect on your phone

Every page works on a phone. The menu moves behind the button at the top left, and tables turn into stacked cards so you never have to scroll sideways.

Sign in, open the menu, and use a page on a phone.

## Words you will see

| | |
|---|---|
| **Academic term** | One school year and semester, for example 2026-2027 1st semester. |
| **Section** | One class of a subject, with its own days, time, room and teacher. |
| **Block** | The set of sections a regular student takes together in one semester. |
| **Regular student** | A student who follows the full block for their year level and semester. |
| **Irregular student** | A student who chooses subjects one by one, for example after a back subject or a credited subject. Their enrollment also goes to the Program Head for approval. |
| **Prospectus** | Every subject in a student's curriculum, with the grade earned so far. |
| **Units** | The credit value of a subject. Tuition is based on the units enrolled. |
| **Assessment** | The amount a student must pay for the term, built from tuition and fees. |
| **Queue number** | The ticket that tells the Cashier when it is your turn to pay. |
| **Certificate of Registration (COR)** | The document that proves you are enrolled. It is available once the Cashier confirms payment. |

## When something goes wrong

| | |
|---|---|
| **The email or password you entered was not recognized** | Check the email and password, then try again. If you are not sure of the password, use **Forgot password?**. |
| **Too many attempts** | Wait a few minutes before you try again. |
| **The code did not arrive** | Check your spam folder, then select **Resend code**. |
| **This verification code is invalid or expired** | Select **Resend code** and use the newest email. |
| **No GRC account was found for this Google email** | Contact Admission or the Registrar's Office to have your account created. |
| **Your session cannot be restored after refresh on this browser** | Your browser is blocking site storage. Allow it for this site, or sign in again after each refresh. |
| **A page is empty** | Check the current term at the bottom of the menu. Most pages wait for the Registrar Head to open the school year and semester. |

> **Tip**
> If none of this helps, contact the office that handles your request: Admission for accounts, the Program Head for schedules, the Registrar for approvals and records, Accounting for payments.

# Program Head

The Program Head turns the college's curriculum into a schedule that the Dean and the Executive Director can approve, assigns professors and rooms, advises irregular students, and maps the credits of students who come from another school.

Your menu has eleven pages. They are grouped below in the order you meet them during a term.

## Your semester at a glance

### Registrar Head

Creates the school year and semester. Enrollment planning opens for you.

### You

Choose the curriculum and the number of block sections for each year level, generate the schedule, assign professors and rooms, and submit it for approval.

### Dean, then Executive Director

Approve the schedule. If they return it, the note tells you what to fix.

### Students

Enroll once the Registrar Head starts enrollment.

### You

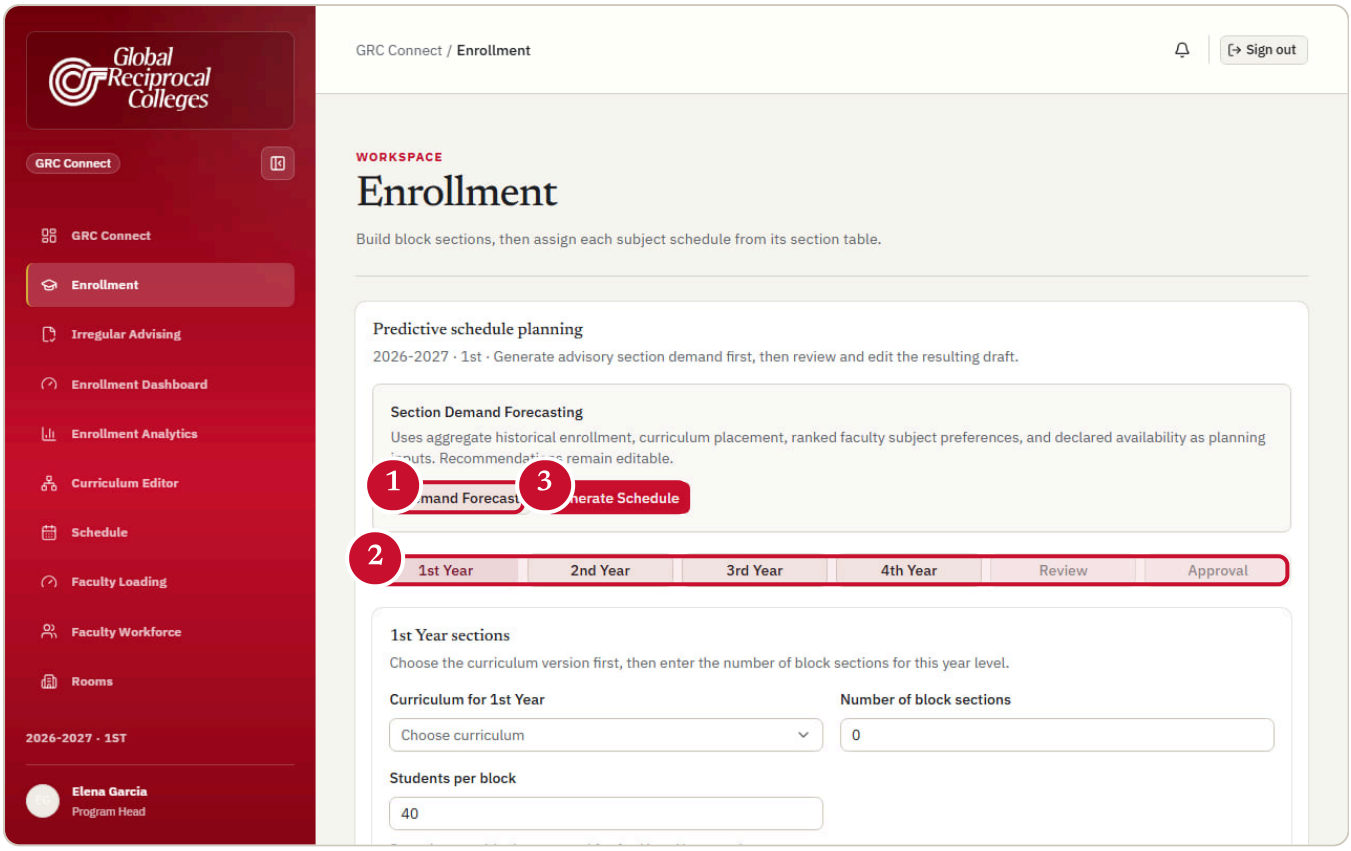

Approve or change the enrollment of each irregular or overloaded student of your college.

### You

Map the credited subjects of transferees, then send them to the Registrar Head.

## Enrollment: plan the term's sections

This is where you build the schedule. It opens after the Registrar Head creates the school year and semester. Until then the page says it is waiting for the Registrar.

Enrollment while the schedule is being planned: Demand Forecast, Generate Schedule and one tab per year level.

1. Select **Demand Forecast** to see the advisory demand for each subject.
   It uses past enrollment, the curriculum, ranked professor preferences and declared availability. It is advice only: you can edit every recommendation.

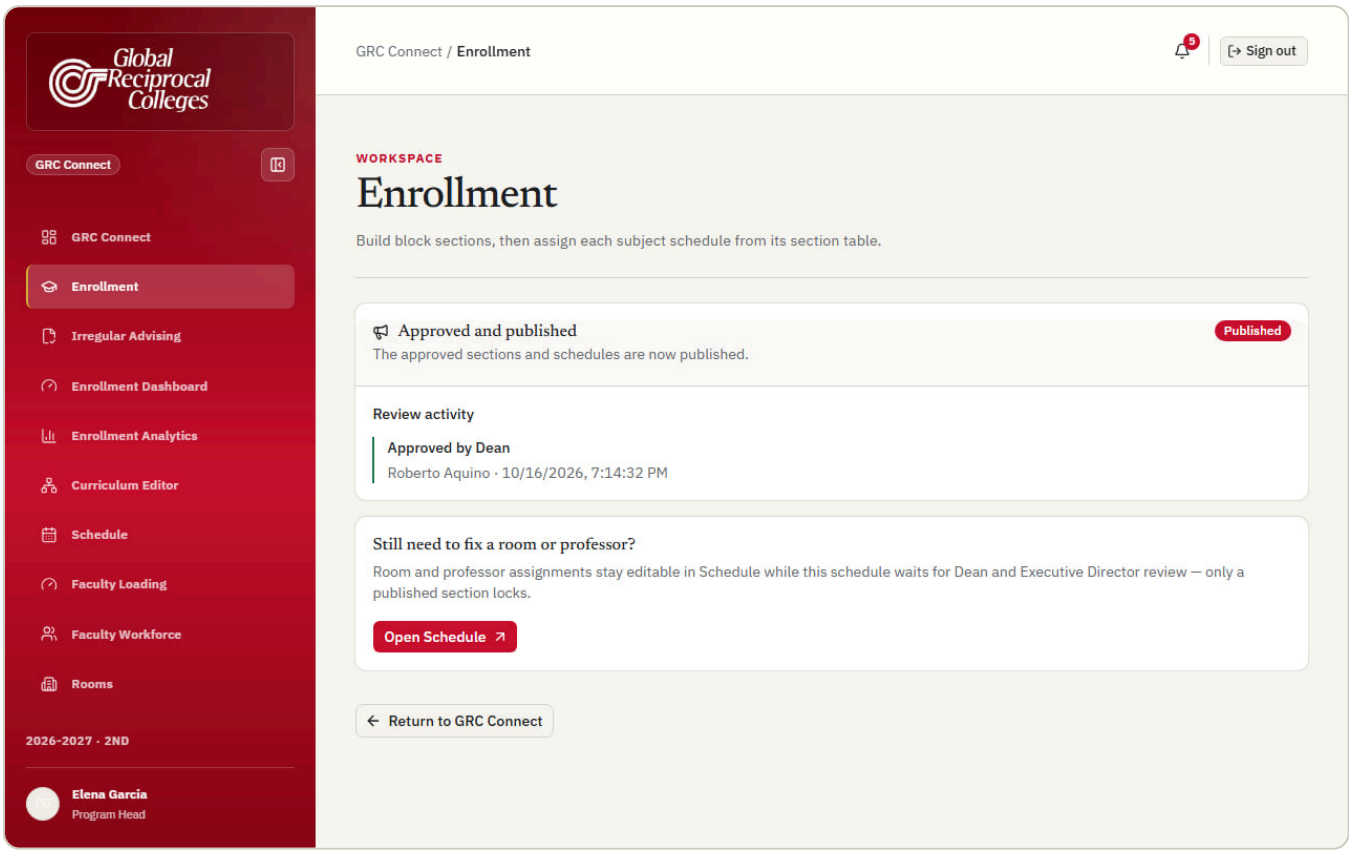

2. In each year-level tab, choose the **Curriculum** and enter the **Number of block sections** and the **Students per block**, then select **Save and continue**.
   Repeat for the 1st to the 4th year. Every year level must be complete before you generate subjects.

3. Select **Generate Schedule** to build a draft, or **Generate subject list** to release the current-semester subjects of each block.

4. Open the **Review** tab and check each block section.
   Select **View schedule & assign** to set the professor, the room, the days and the time of a subject. Changing a recommendation asks for an **Override reason**, and the original recommendation stays in the audit trail.

5. Open the **Approval** tab and select **Submit for Dean and Executive Director Approval**, then **Confirm submission**.

> **Good to know**
> If the Dean or the Executive Director returns the schedule, the page shows **Returned for correction** with their note and the menu marks Enrollment as **Returned**. Fix what the note asks and submit again. **Schedule approval history** lists every decision.

After approval the page shows Approved and published, with the review activity.

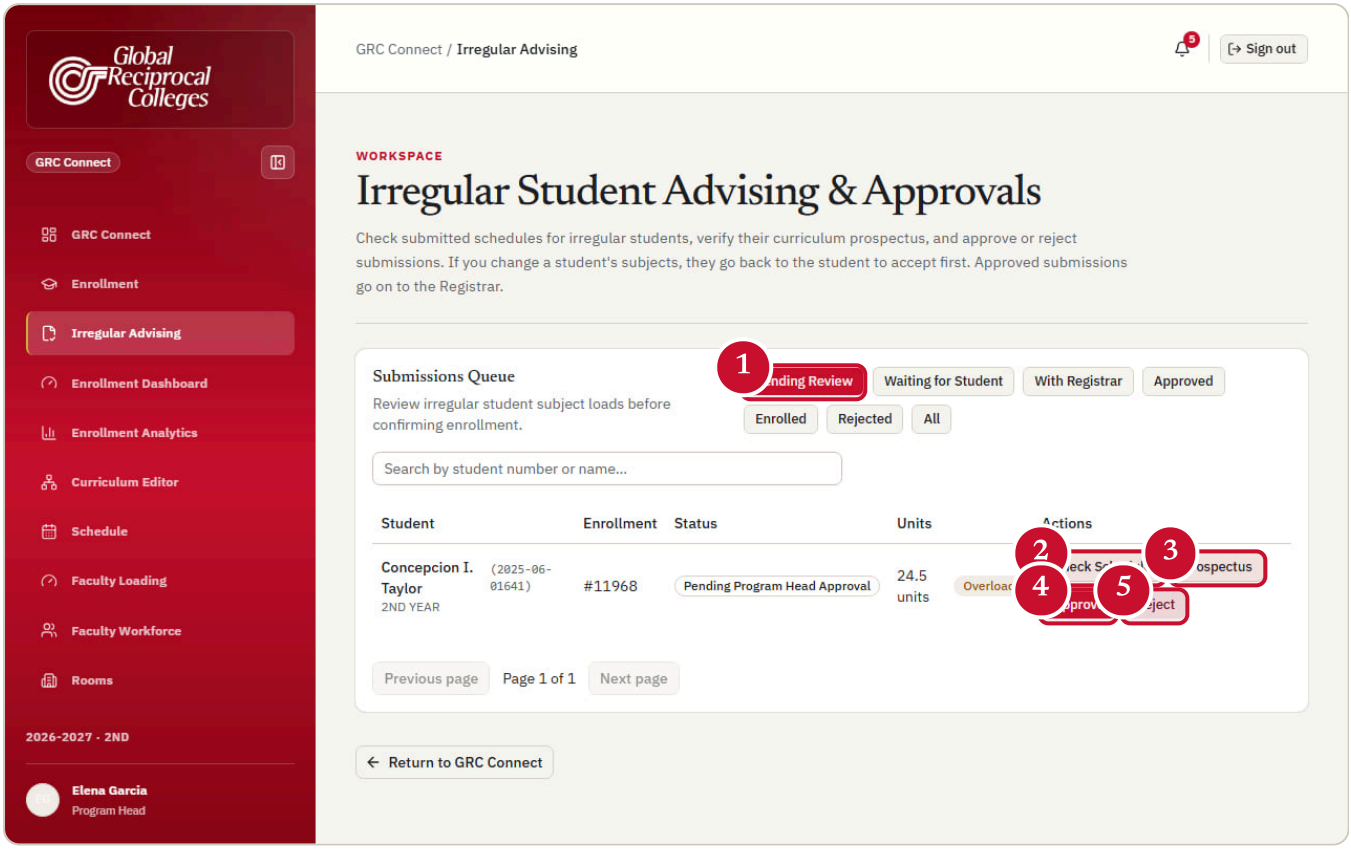

## Irregular Advising: approve irregular enrollments

A student who picks subjects one by one, or who goes over the regular unit load, needs your approval before the Registrar sees the enrollment.

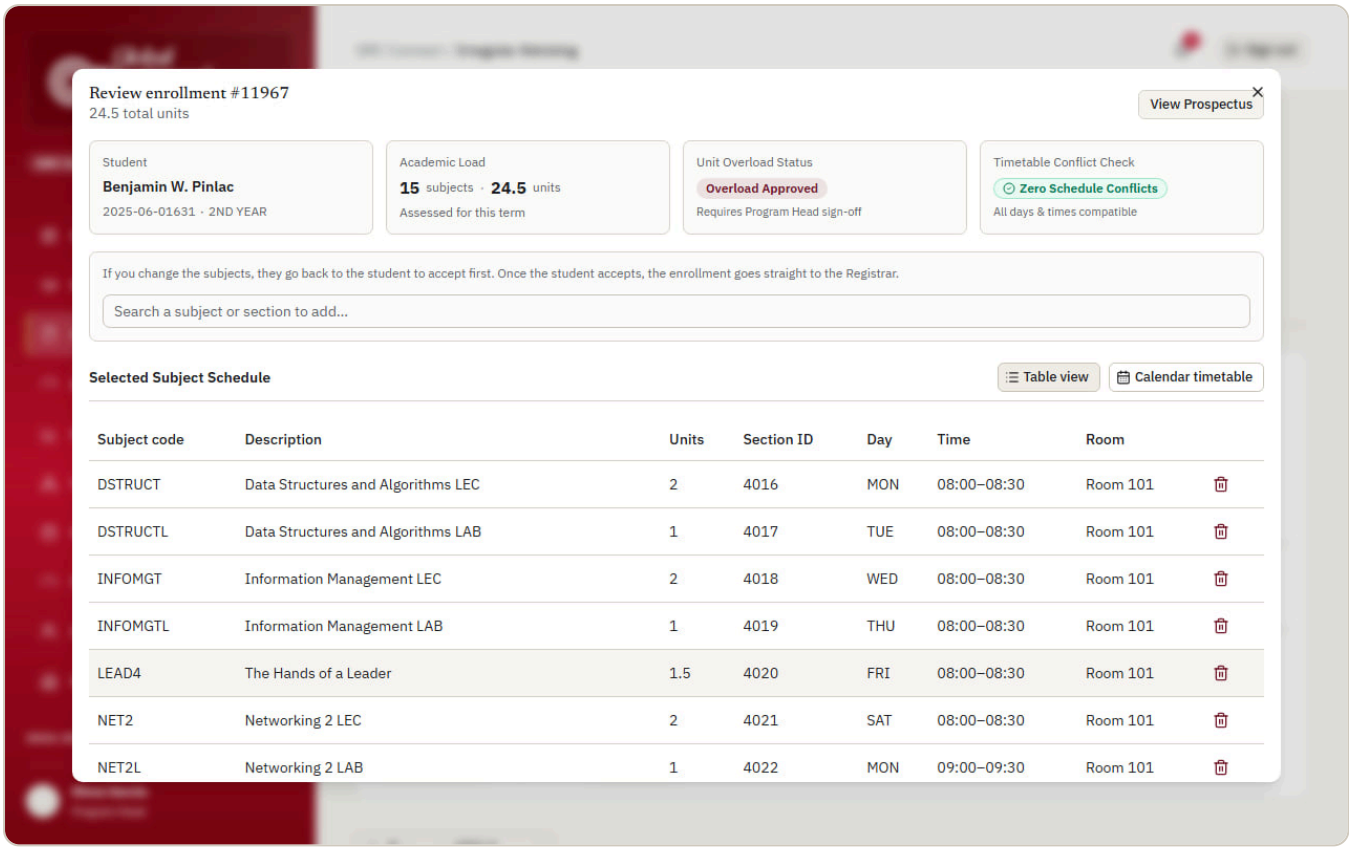

1. Open **Irregular Advising**. **Pending Review** lists what needs you.
2. Select **Check Schedule** to see the student's chosen subjects, units and any timetable conflict.
3. Select **Prospectus** to see the student's whole curriculum and grades.

4 Select **Approve** to send the enrollment on to the Registrar.

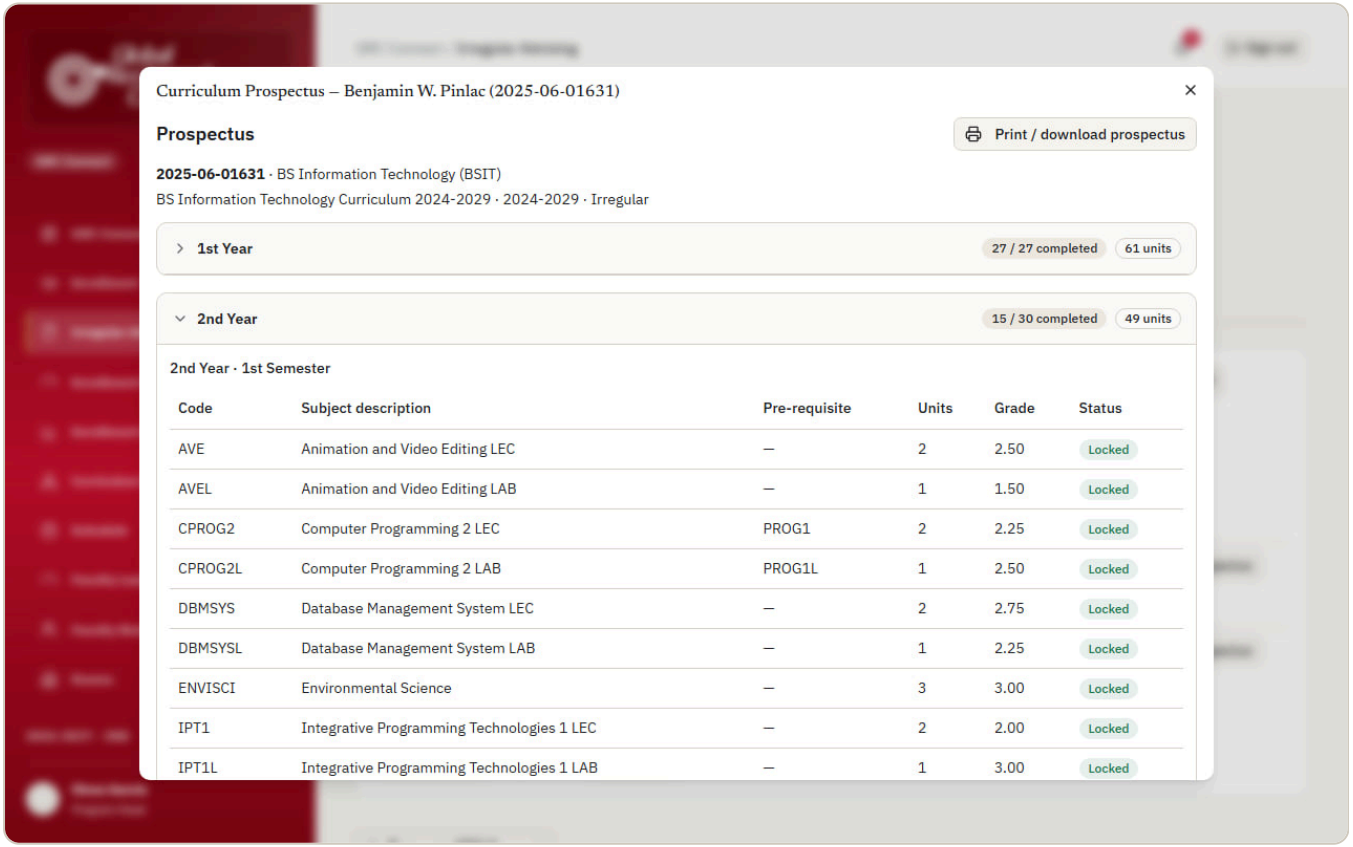

5 Or select **Reject** and give the reason.

The submissions queue. The tabs filter by where each enrollment is.

The schedule check window shows the student, the load and the chosen subjects.

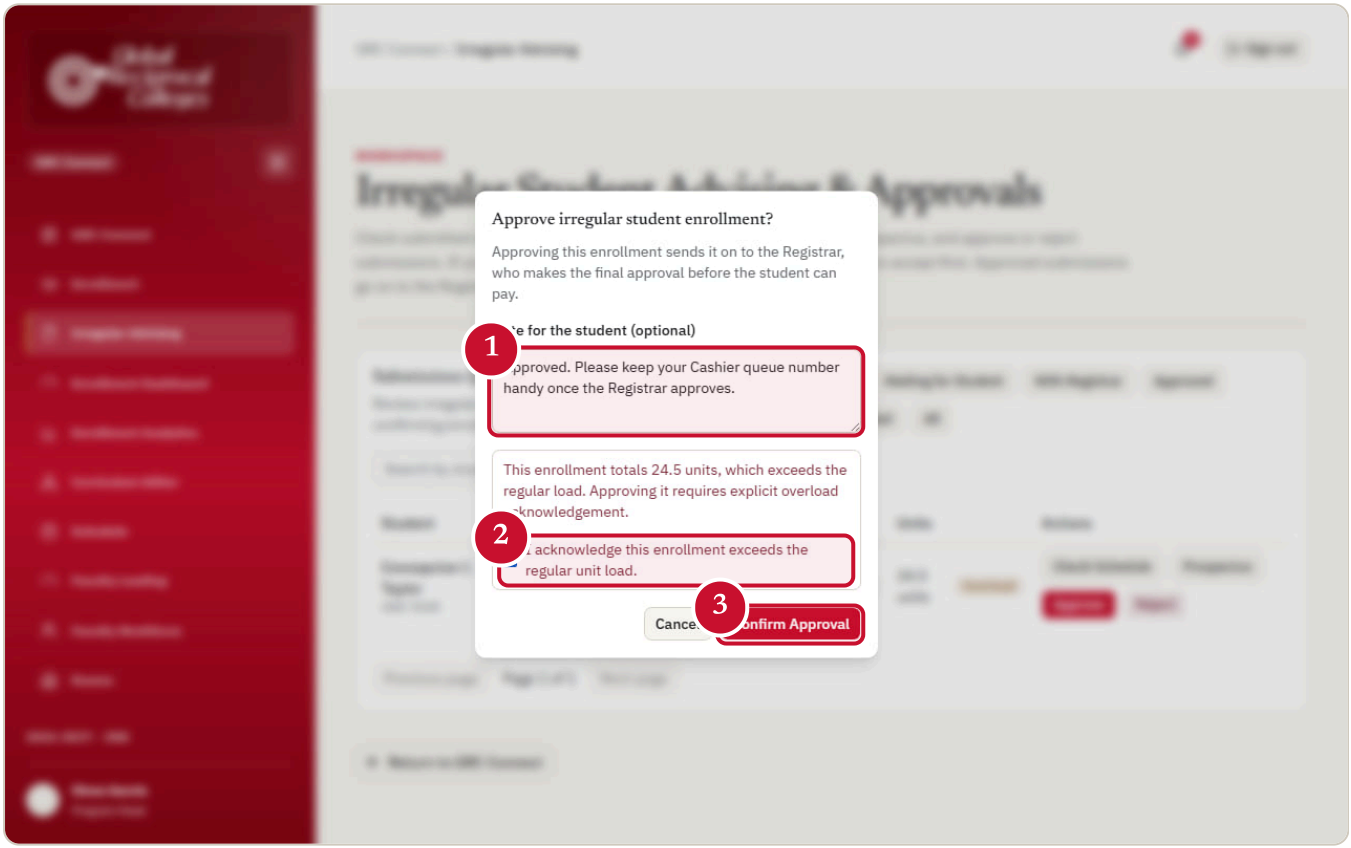

**Prospectus** shows every subject of the student's curriculum and its grade or status.

> **If you need to change the subjects**
> In the schedule check window, search a subject or section to add one, or use the bin icon to remove one. The enrollment then goes back to the student, who must accept it before the Registrar sees it.

When you select **Approve**, a window asks you to confirm.

1. Write a **Note for the student** if you want to. It is optional.
2. When the enrollment is over the regular unit load, tick **I acknowledge this enrollment exceeds the regular unit load**.
3. Select **Confirm Approval**. It stays off until the acknowledgement is ticked.

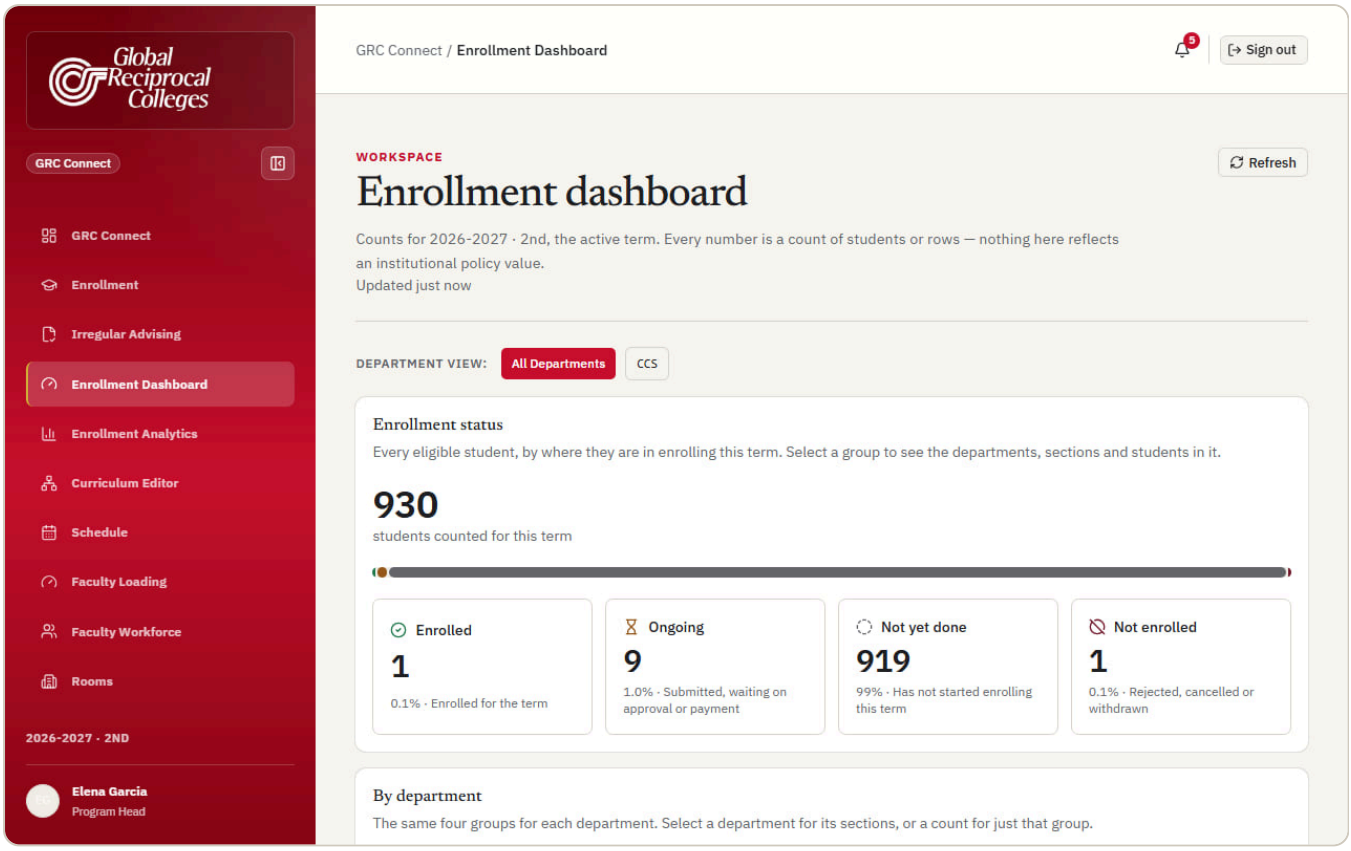

Approving an overload needs you to acknowledge it.

**Waiting for Student**: you changed the subjects and the student has not answered yet.

**With Registrar**: you approved it and the Registrar is reviewing it.

## Enrollment Dashboard

How far your college has come this term.

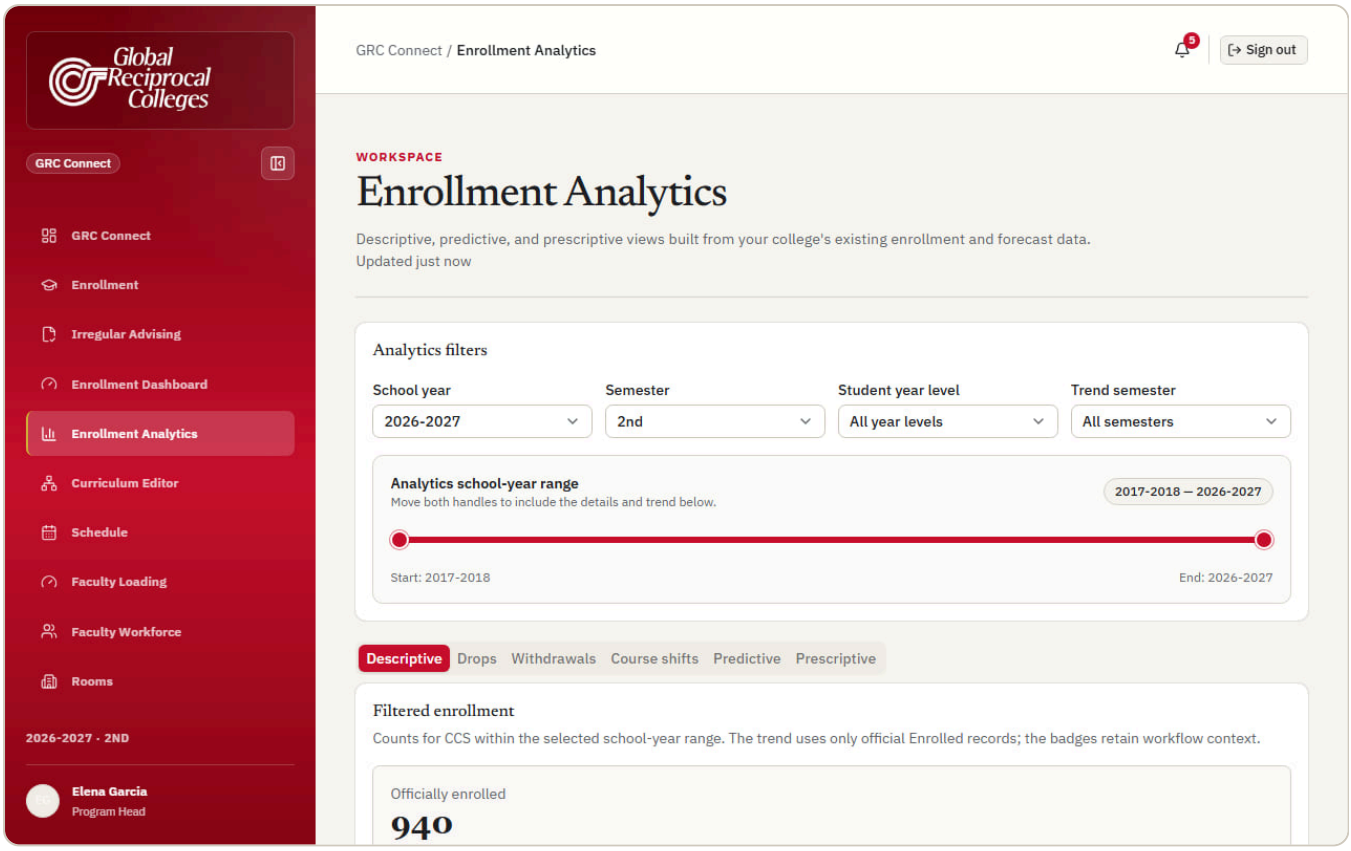

Counts for the active term, from overall down to each student.

1. Read the four groups: **Enrolled**, **Ongoing** (submitted, waiting on approval or payment), **Not yet done**, and **Not enrolled** (rejected, cancelled or withdrawn).
2. Select a group, a section or a student to see who is in it.
3. Select **Refresh** for the latest counts.

## Enrollment Analytics

Descriptive, predictive and prescriptive views built from your college's own enrollment and forecast data.

Enrollment Analytics with filters for school year, semester and year level.

Use the filters at the top to choose the **School year**, **Semester**, **Student year level** and **Trend semester**, and drag the school-year range to include more or fewer years.

**Descriptive**: the officially enrolled students of your college, with the workflow badges for those still in progress.

**Drops**, **Withdrawals** and **Course shifts**: the same filters applied to each kind of change.

**Predictive**: the section demand forecast, with the predicted students and sections needed for each subject.

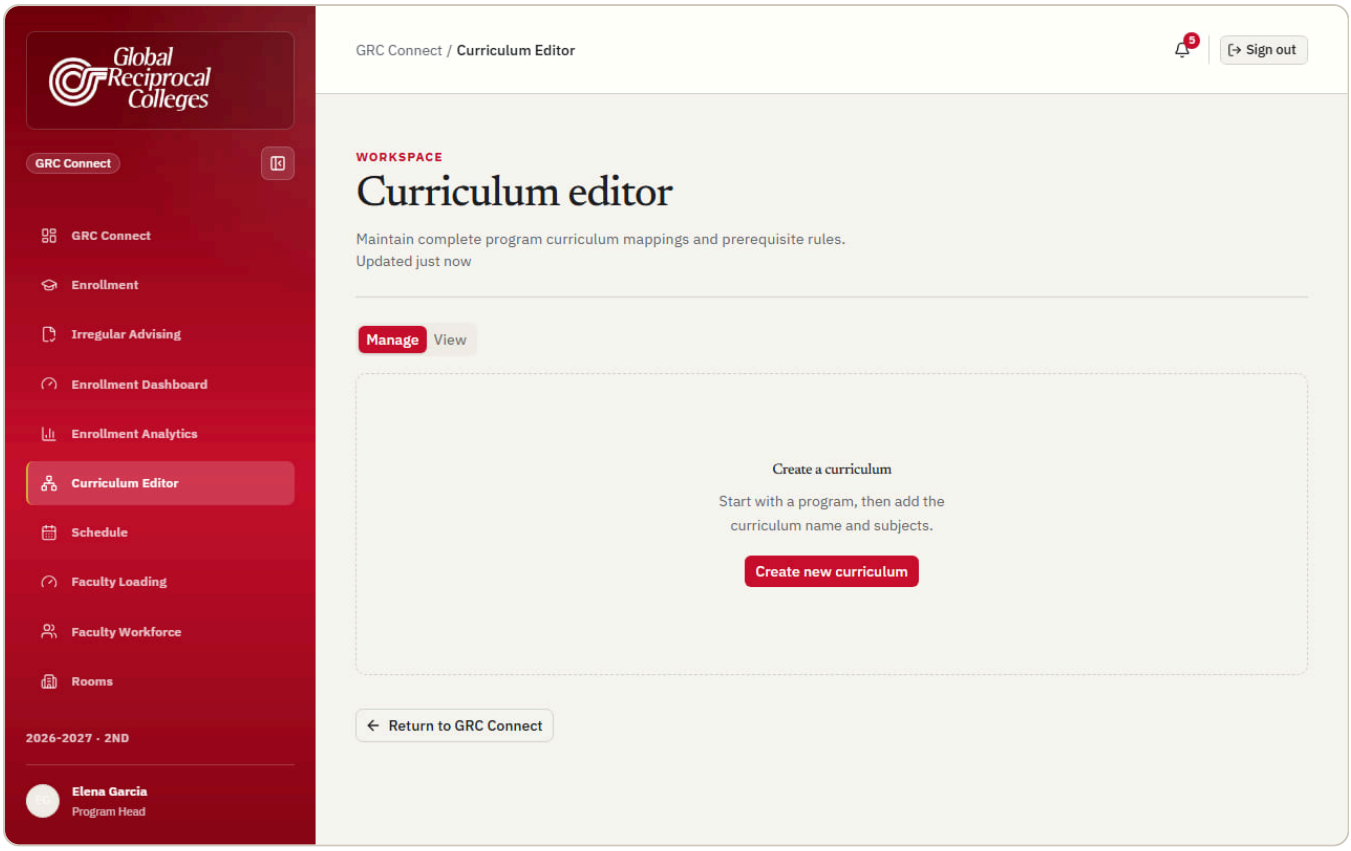

**Prescriptive**: a short list of recommended actions, such as unassigned professors and overload flags.

> **Be careful**
> Forecasts and recommended actions are advice. They never enroll or refuse a student on their own, and you can edit every recommendation.

---

## Curriculum Editor

Build each year level's subject list, units and prerequisites. A curriculum goes to the Dean and the Executive Director for approval before it is used.

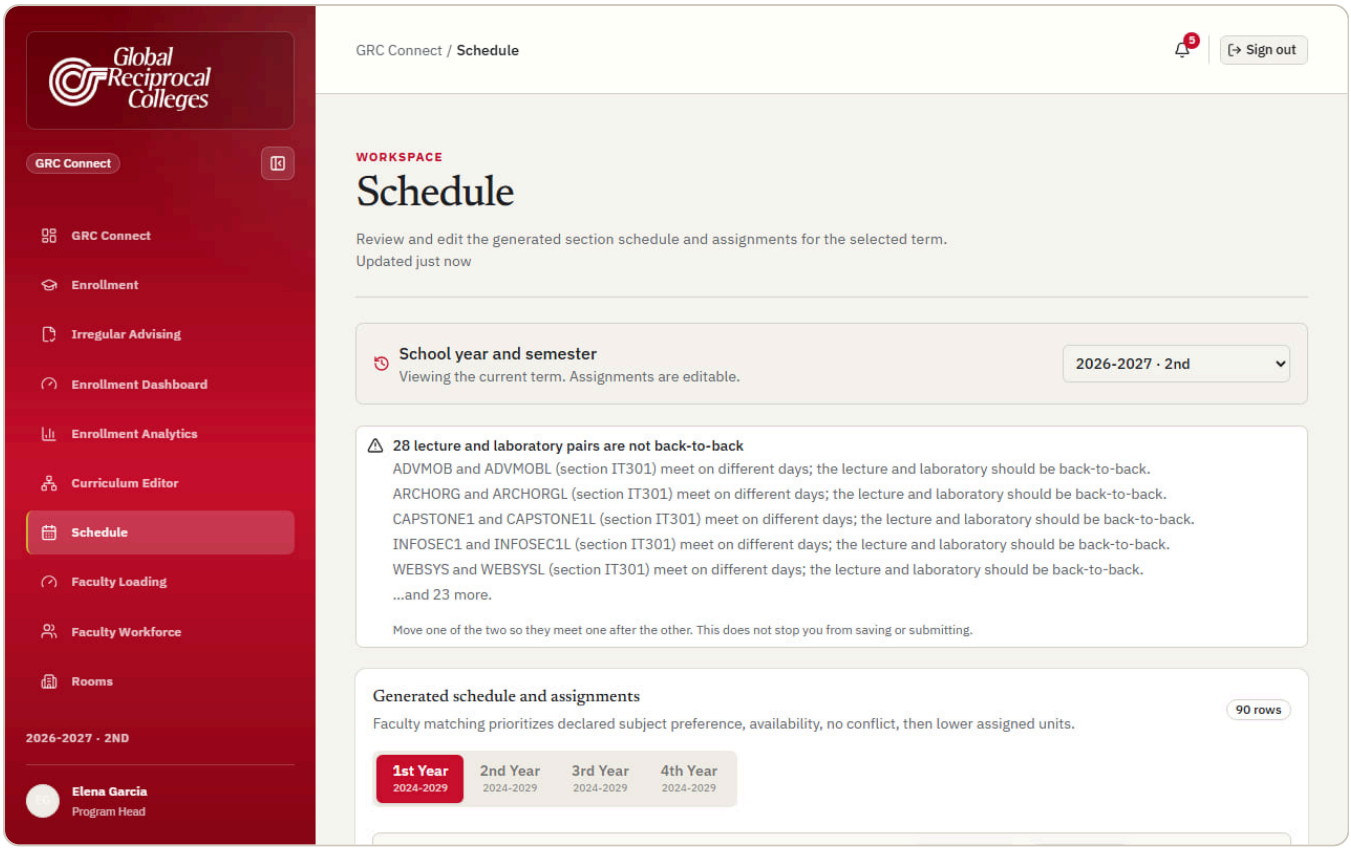

The Curriculum Editor.

1. On **Manage**, select **Create new curriculum** to start with a program, then add the curriculum name and its subjects. Or select **Open saved curriculum** to carry on with a draft.
2. Pick the year level and edit its subject placements and prerequisites. Edits to a draft save automatically.
3. Set the **Maximum Student Unit Limit** if the college needs a custom one, then **Save changes**.
4. Select **Submit for Dean Review**, check the summary and select **Confirm & Submit**.

> **Good to know**
>
> **Manage**
> lets you edit a draft.
>
> **View**
> is a read-only preview of a curriculum that is already in use.

## Schedule

Review and edit the generated sections and their assignments for the selected term.

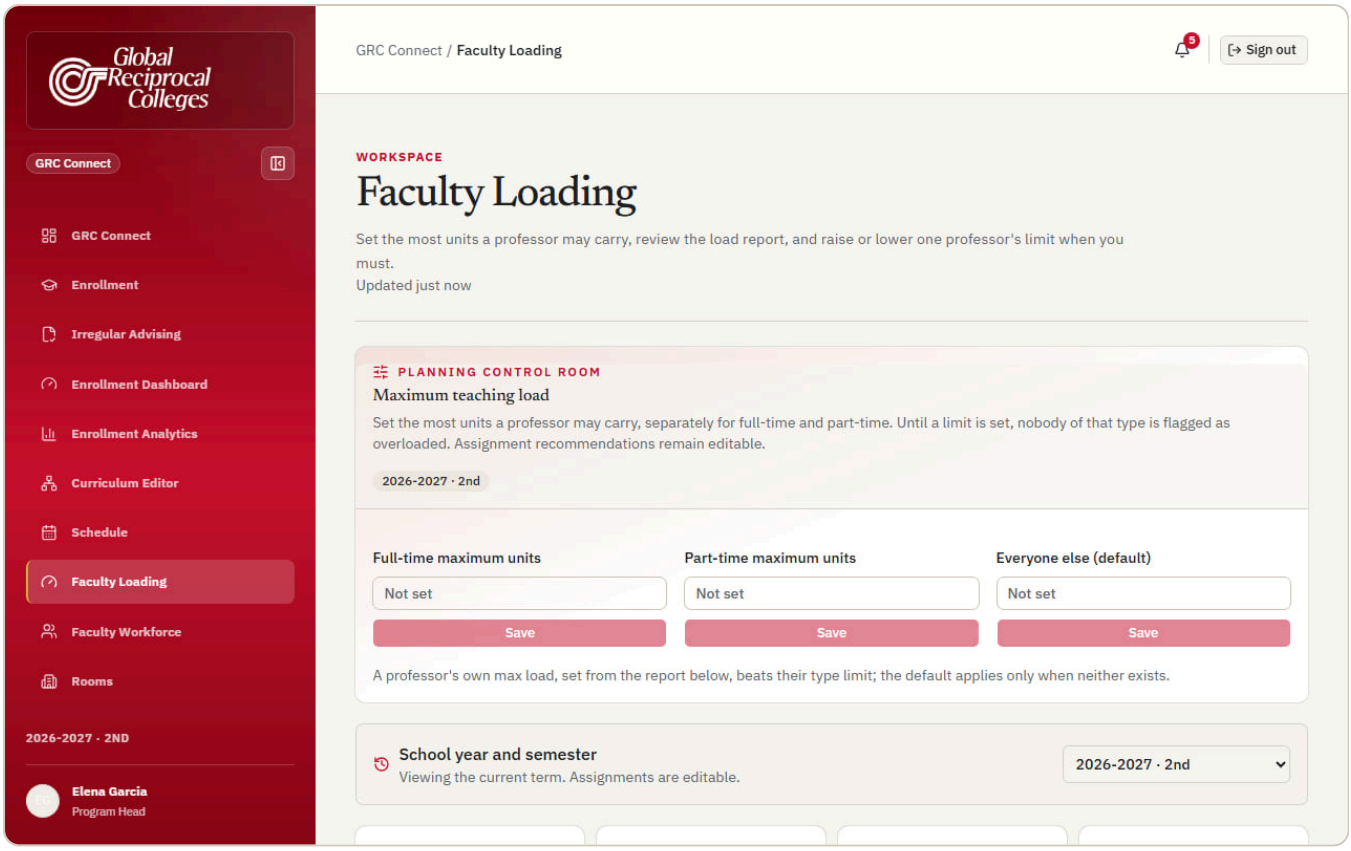

The generated schedule and its assignments.

1. Filter by year level, then open a section with **View schedule & assign**.
2. Choose the professor. The system matches by declared preference, availability, no conflict, then the lower assigned units.
3. Read the warning at the top. It lists lecture and laboratory pairs that are not back-to-back. It never stops you from saving or submitting.
4. Choose the room and time on the room calendar, so the slot is conflict-free.
5. Select **Save professor only** or save the section.

> **Be careful**
> Once a schedule is published, a change needs a reason and is sent to the Registrar Head as a **Request change**. It does not apply until the Registrar Head approves it.

## Faculty Loading

Set how many units a professor may carry and read the load report.

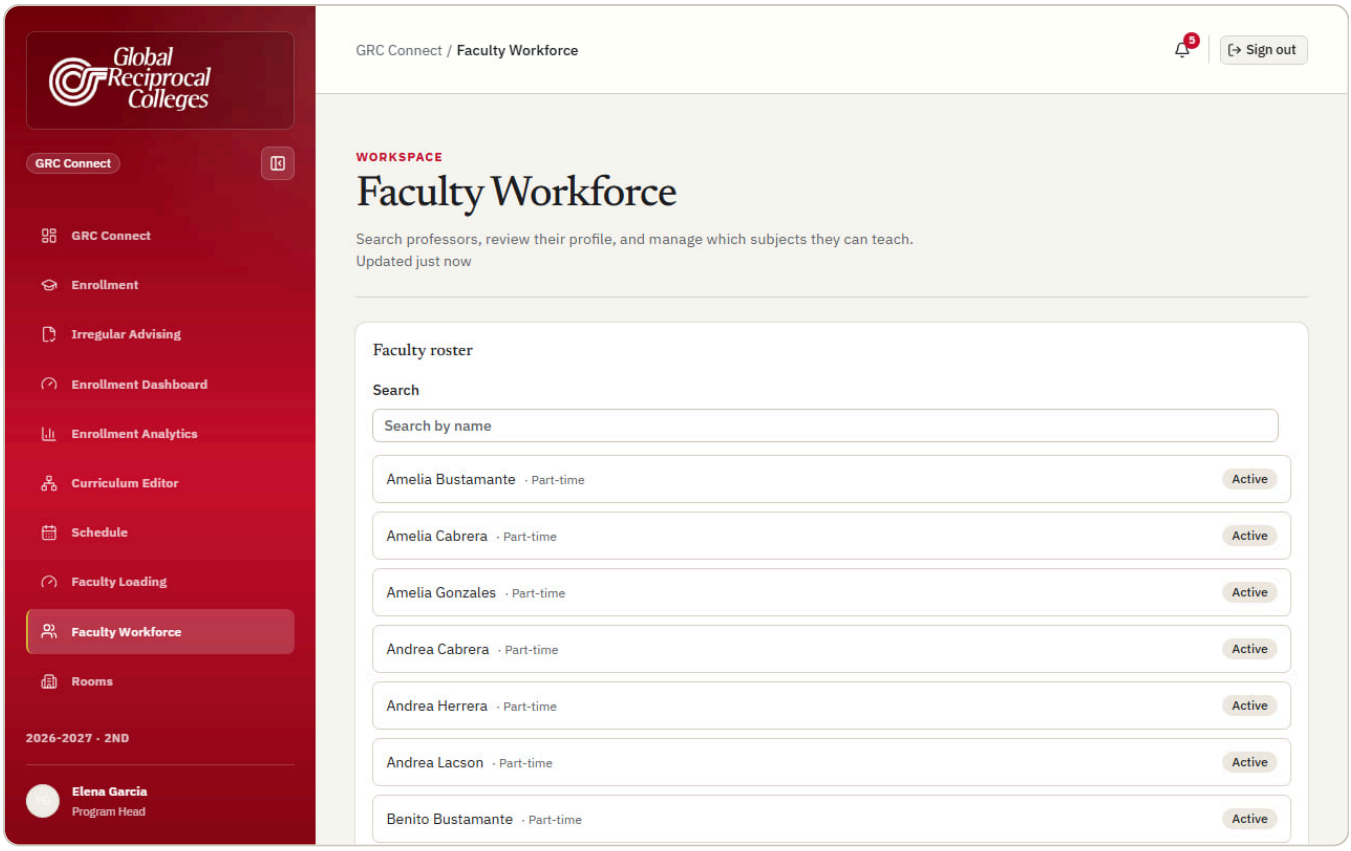

Maximum teaching load and the Faculty Load Report.

1. Under **Maximum teaching load**, set the default for full-time and part-time professors and select **Save default maximum units**.
2. Use the filters to narrow the **Faculty Load Report** by subject, professor or both.
3. For one professor who needs a different limit, select **Set max load**. **Remove own max load** returns them to the college default.
4. Check **Flags to review** for unassigned subjects or overloads.

## Faculty Workforce

Your college's professors, their status and the subjects each may teach.

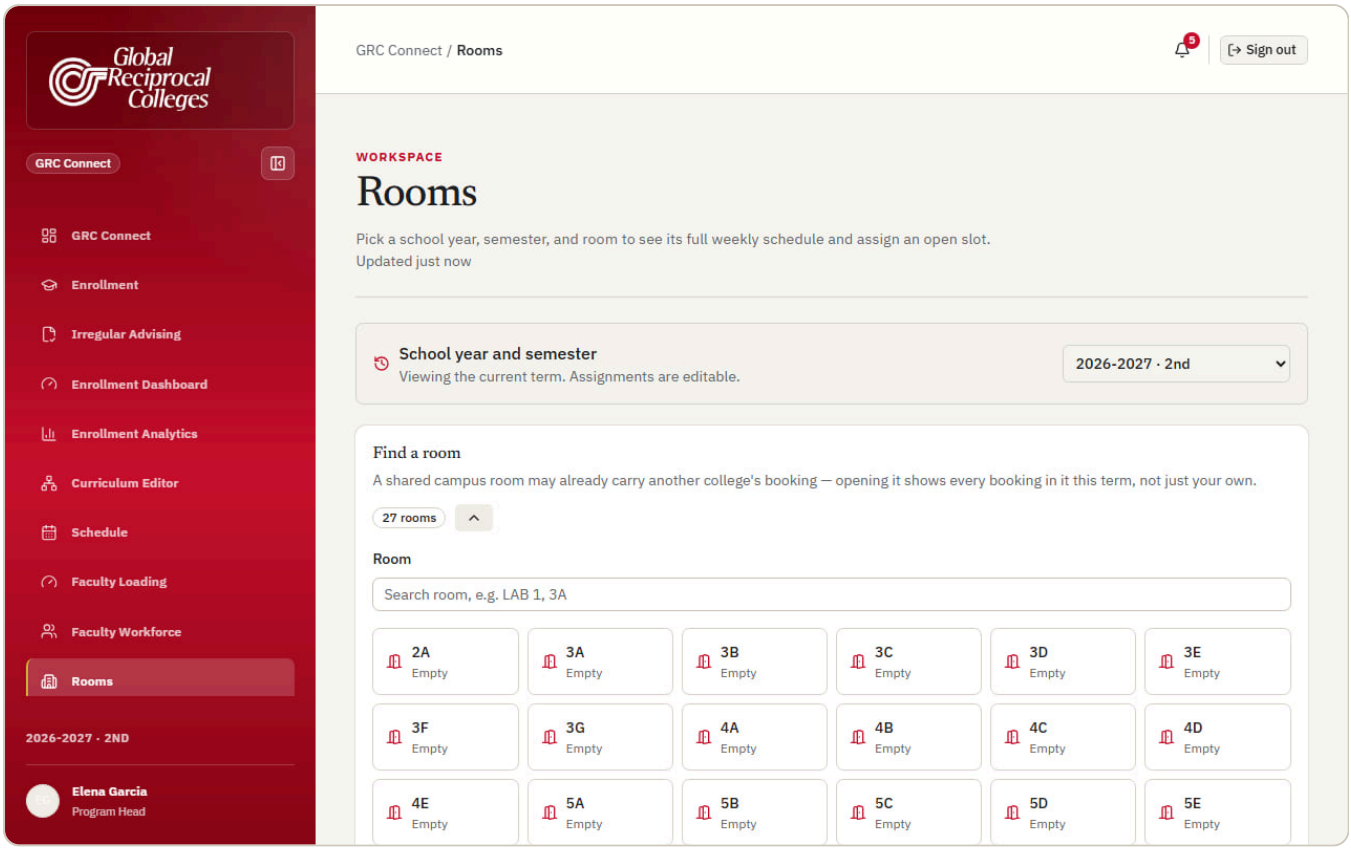

The faculty roster.

1. Search a professor by name, and filter by account status or employment type.
2. Select a professor to review their profile, teaching load and timetable.
3. Change their status or employment type, record the reason for the change, and select **Save workforce profile**.
4. Approve which subjects they may teach.

## Rooms

Check room availability before assigning a section.

Room availability and the sections still awaiting a room.

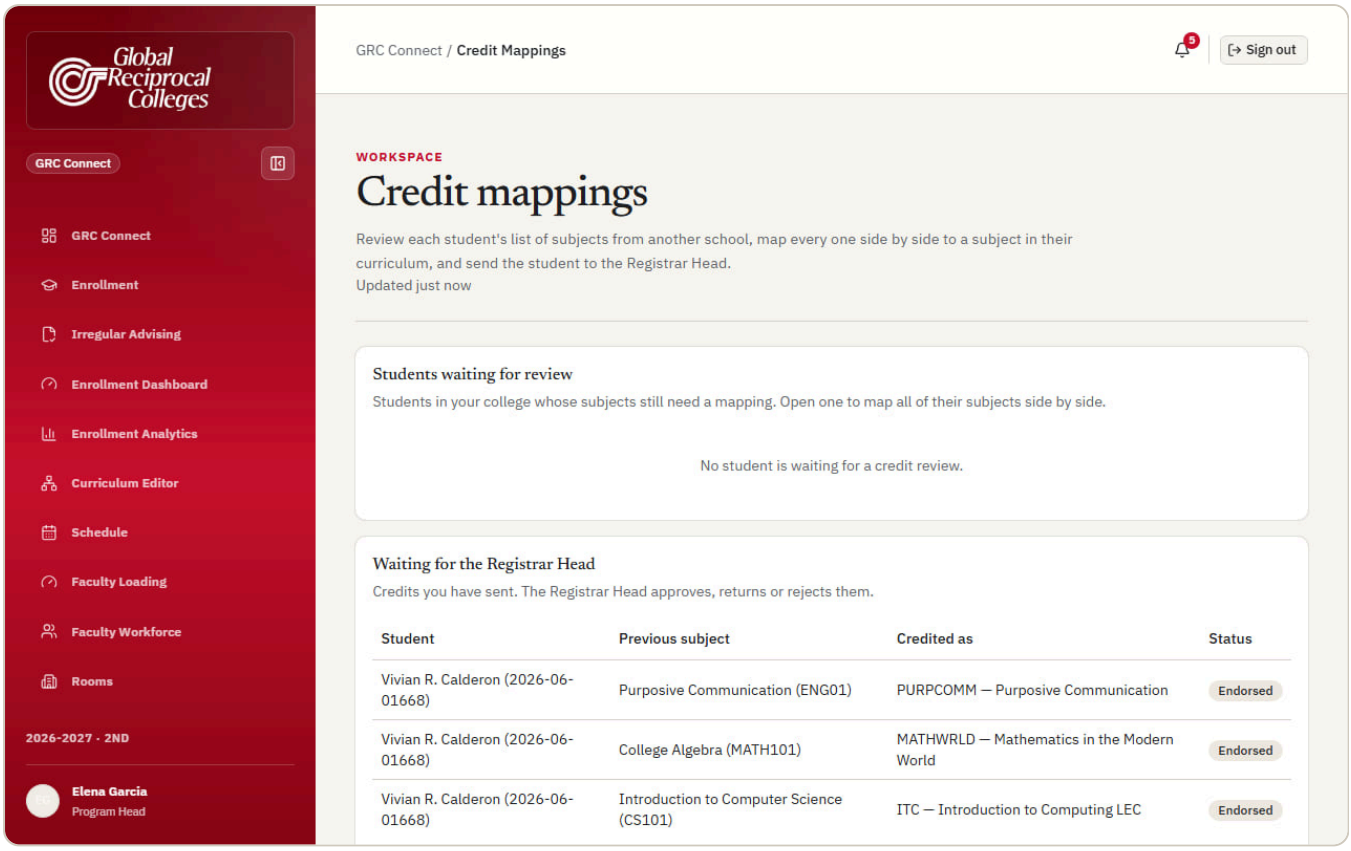

**Find a room**: pick a school year, semester and room to see its whole week and every college's booking in it.

**Awaiting a room**: sections that have no room yet. Select **Assign a room** to place one.

---

# Credit Mappings

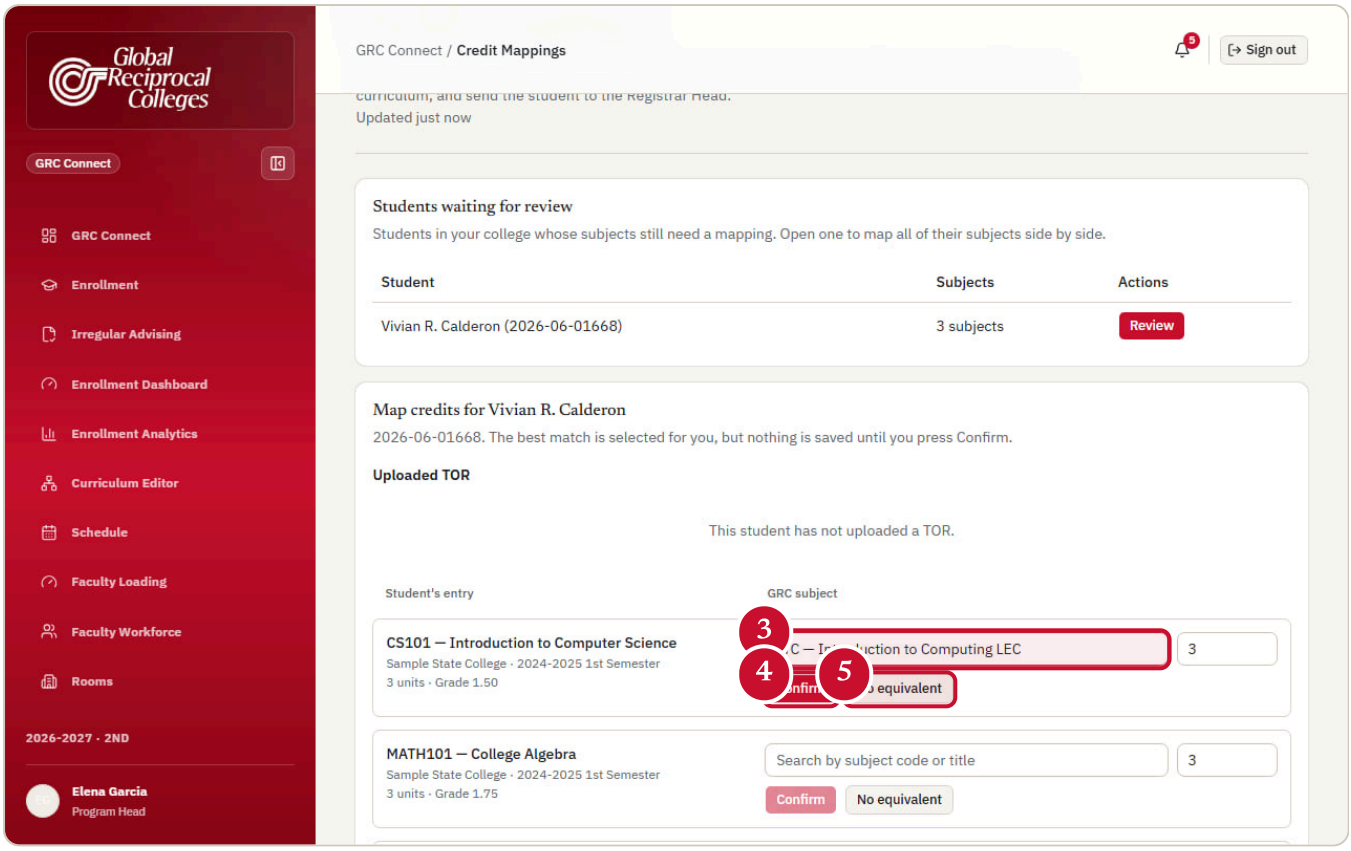

Students who come from another school send a list of the subjects they took. You decide which GRC subject each one counts as, and the Registrar Head approves it.

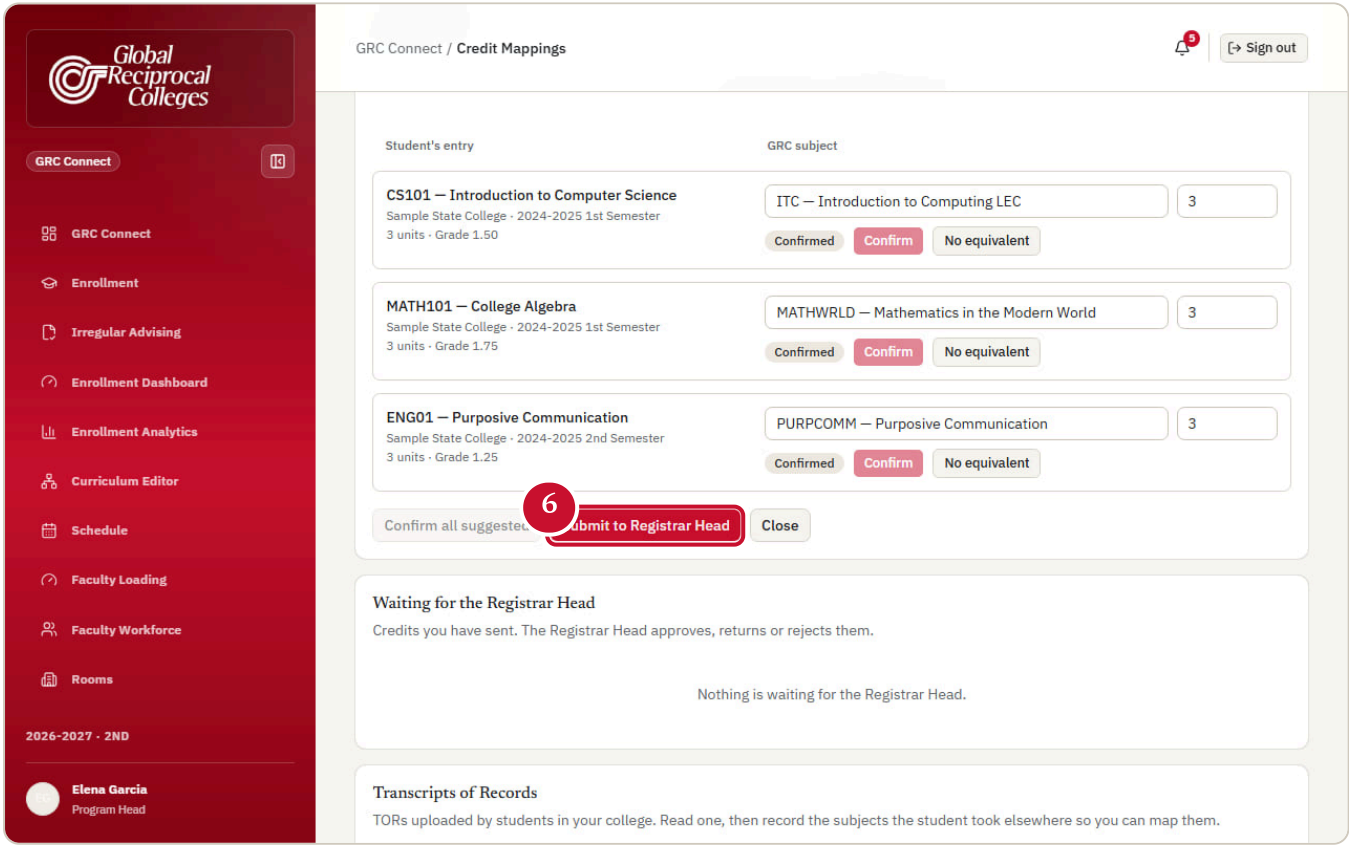

Students waiting for a credit review, and the credits you have already sent.

1. Open **Credit Mappings**. **Students waiting for review** lists the students of your college.
2. Select **Review** for a student.
3. Under **Map credits for** the student, take each previous subject in turn and search the GRC subject it counts as, by code or title. If the system found a best match, it is already selected for you.
4. Select **Confirm**. Nothing is saved until you do.
5. If the subject cannot be credited, select **No equivalent** and write why. The student is told the reason.
6. When every subject is confirmed, select **Submit to Registrar Head**. The student then appears under **Waiting for the Registrar Head**.

> **Tip**
>
> **Confirm all suggested**
> confirms every suggested match in one step. It stays off when the system has no suggestion for the student's subjects.

Steps 3 to 5: the side-by-side mapping, one row for each previous subject.

Step 6: submit once every subject is confirmed.

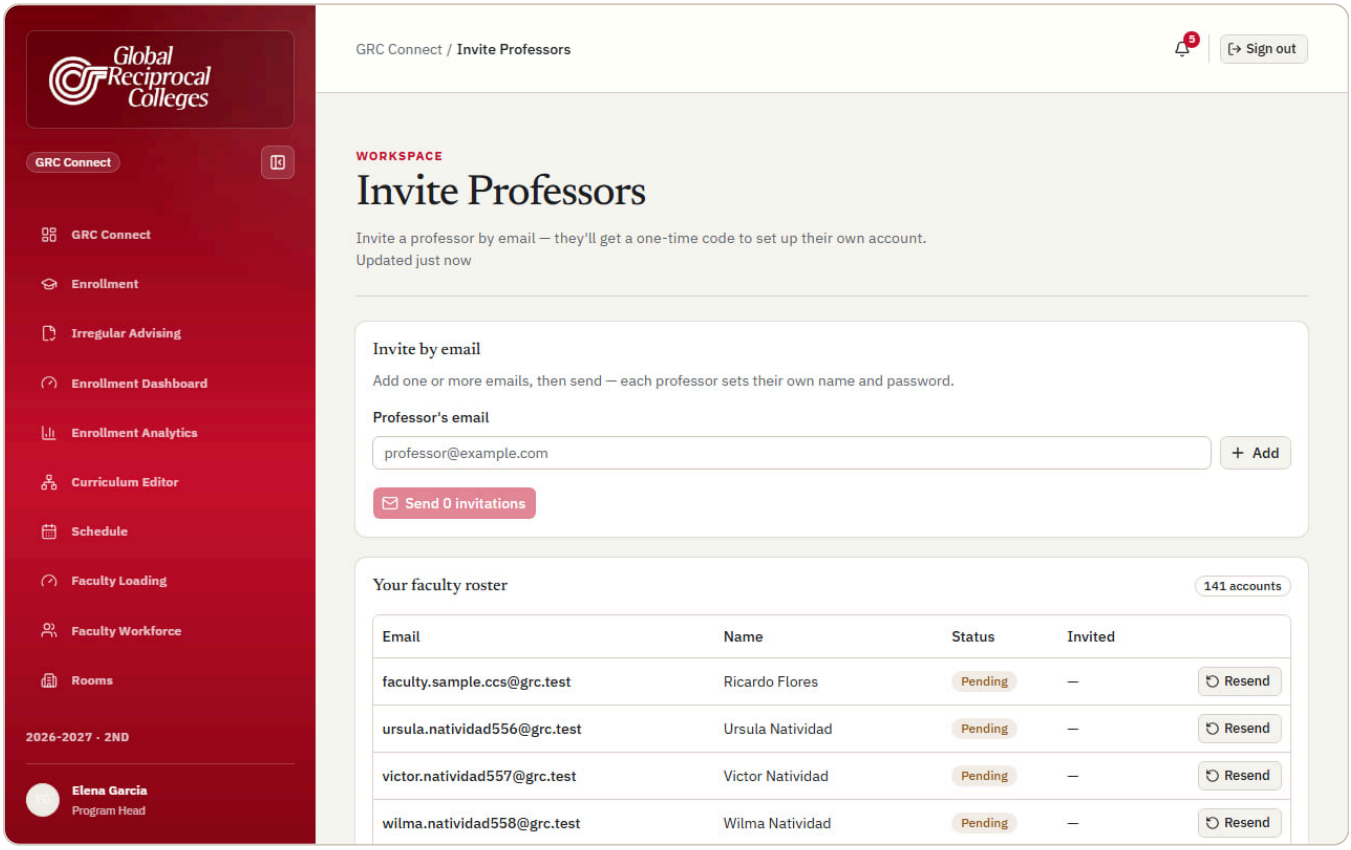

> **Tip**
> For a student who did not ask online, use
> **Record a credit for a student**
> : find the student, enter the previous school, subject and units, and select
> **Record credit**
> .

Under **Transcripts of Records** you can read the TOR a student uploaded. Read it, then record the subjects the student took elsewhere so you can map them.

---

## Invite Professors

Invite a professor by email. They set their own name and password with a one-time code.

Invite professors and follow their status.

1. Under **Invite by email**, add one or more email addresses and send.
2. Follow each invitation in **Your faculty roster**: **Invited**, active, or **Delivery failed**.
3. Select **Resend** if the code expired or never arrived.
